

"I have found Professor Waterhouse a gentleman in society, & a scholar in the Class-room. Economical considerations will not allow us to avail ourselves longer of his services. I shall part with him with many regrets. I feel exceedingly anxious to find him some place where his talents & his unusual acquisitions for one of his age may be applied to use.

I think him well qualified for any position requiring educated labor. I believe Professor Waterhouse to be a most faithful & efficient teacher & heartily recommend to any Institution which may need his services".  
Horace Mann.
