454 1/2 of No 407 in the Phrenological Collection. - 1847.
Dr. J. L. Waver.
1129. Large renal calculus. - The follg. account of this
2677. case was published in the Boston Medical Intelligence for
March 2^d, 1826, by Dr. J. Loomis, of Lynn, Mass. -
"Aug. 12, 1819 Mrs. W. told me that" till within six weeks
she had attended to her family concerns, & nursed her infants,
then six months old. For two years she had experienced
pain in each side, particularly in the left. Four weeks
since she told her physician of it. He prescribed the pil.
hydrarg. a sub. man. hyd., which she had now taken 4
weeks, 3 daily. Lactation had now ceased; ptyalism,
loss of appetite, great emaciation & prostration of strength
had succeeded. Over the seat of pain I distinctly felt
a hard tumor in the left lumbar region, not yielding
to pressure. There had been no irregularity nor deficiency
in the urinary discharge. - She died Aug. 22. - All the vis-
cera seemed healthy, except the kidneys. The left ureter
was imperious; the right I was prevented from examining.
I removed the tumor on the left side, weighing four
lbs.; containing the kidney, thickened peritoneum, & a
