Summary Information

- Repository:** Center for the History of Medicine (Francis A. Countway Library of Medicine)
- Creator:** Finland, Maxwell.
- Title:** Maxwell Finland papers
- Identifier:** H MS c153
- Date:** 1916-2003
- Physical Description:** 38.5 cubic feet (35 record cartons, three document boxes, two half-document boxes, one legal document box, and three oversized flat boxes)
- Language Of Materials:** English
- Overview:** The Maxwell Finland papers, 1916-2003, document Finland's career as a specialist in infectious diseases at Boston City Hospital and as George Richards Minot Professor of Medicine at Harvard Medical School.
- Conditions Governing Access:** Collection is open for research. Access requires advance notice. There are restrictions on access to portions of this collection. Personnel and patient information is restricted for 80 years from the date of creation. These restrictions are noted where they appear in Series I, II, III, IV, V, VI, VII, and IX. Access to Harvard University records are restricted for 50 years from the date of creation. These restrictions are noted where they appear in Series III. Researchers may apply for access to restricted records. Consult [Public Services](#) for further information.
- Conditions Governing Use:** The Harvard Medical Library does not hold copyright on all materials in the collection. Researchers are responsible for identifying and contacting any third-party copyright holders for permission to reproduce or publish. For more information on the Center's use, publication, and reproduction policies, view our [Reproductions and Use Policy](#).
- Immediate Source Of Acquisition:** The Maxwell Finland papers were donated to the Harvard Medical Library in the Francis A. Countway Library of Medicine in 1998-1999.
- Processing Information:** Processed by: Alyson Reichgott, with advice and comments by Dr. Jerome O. Klein, June 2004
- Processing note: This collection includes papers formerly identified as GA 27. Approximately 2.5 cubic feet of materials were incorporated into the larger collection from GA 27, Maxwell Finland. Approximately twenty-seven cubic feet of duplicate, unmarked photocopies, reprints, form correspondence, administrative memoranda, drafts, published volumes, pamphlets, and brochures were removed and discarded, along with unduplicated material of a personal or financial nature, either to MF or others, including retirement or insurance information, receipts, invoices, travel vouchers, tax returns, pay stubs or salary information, copies of checks, and professional article reviews. Sixty-two cubic feet of material, acquired in 1999, were organized into eleven series of this collection. Although some acidic paper has been photocopied and removed, generally good paper condition and the prohibitive amount contained in the collection prevented blanket photocopying. This may be addressed more systematically as resources and time warrant.
Library Catalog ID 007873680
Library Catalog Link <http://id.lib.harvard.edu/aleph/007873680/catalog>
- Related Materials:** Related collections in the Center for the History of Medicine include Maxwell Finland's faculty publications (1.Mh.1943.F) and the Thorndike Memorial Laboratory at Boston City Hospital's collected publications (1.Mhl.1922.1). Additional records include:
- Badger, Theodore L. Papers, 1934-1981.
 - Davidson, Charles S. (Charles Sprecher), 1910-. Papers, 1940-1910.
 - Ingbar, Sidney H. Papers, 1926-1901.
 - Kass, Edward H. (Edward Harold), 1917-. Papers, 1908-1990.
 - Klein, Jerome O., 1931-. Papers, 1957-2002.
 - Minot, George Richards, 1885-1950. Papers, 1908-1951.
- For more information on related materials, consult the Public Services Librarian.
- Preferred Citation:** Maxwell Finland papers, 1916-2003 (inclusive). H MS c153. Harvard Medical Library, Francis A. Countway Library of Medicine, Boston, Mass.

Biography

Maxwell Finland (MF), Director of the Second and Fourth Medical Services and the Thorndike Memorial Laboratory (TML) at Boston City Hospital (BCH), and George Richards Minot Professor of Medicine at Harvard Medical School (HMS), was an infectious diseases specialist, academic physician, and ethicist who studied the safety and effectiveness of antibiotics. He was born 15 March 1902 near Kiev, Russia, to Frank and Rebecca (Povza) Finland. His family emigrated to the West End of Boston when he was four years old, and he graduated from the Boston English High School in 1918. He graduated from Harvard College, cum laude, in 1922, after earning his way through school giving Hebrew lessons. MF received the MD from HMS in 1926.

Following graduation from HMS, MF served briefly as an assistant resident physician at the Boston Sanatorium, before joining the staff at BCH in 1927 as a house officer with the Second Medical Service. He became Physician-in Chief of the Fourth Medical Service in 1939, and Director of the Second and Fourth Medical Services in 1963. When MF began treating patients at BCH in the late 1920s, nearly half of patient deaths were caused by pneumonia. Finland began treating his patients with pneumonia anti-sera; a few years later he was evaluating the use of sulfanilomides, and shortly after began many years of work on penicillin and subsequent generations of antibiotics. Over the course of his career, MF supervised the treatment of over 20,000 patients with pneumonia and other infections.

TML at BCH accommodated Finland's research projects for forty years. He was first appointed Assistant Resident in 1929, and was eventually promoted to Director in 1963. While he officially retired from both BCH and TML in 1968, he maintained an office in BCH's Channing Laboratory, where he continued to conduct research and write professional articles until 1983. The Maxwell Finland Laboratory for Infectious Diseases at BCH was dedicated in 1979.

MF's affiliation with HMS spanned his entire career. He was first appointed Charles Follen Folsom Teaching Fellow in Hygiene and Assistant in Medicine at HMS in 1928, and rose steadily through the academic ranks to become George Richards Minot Professor of

Medicine in 1963. He became George Richards Minot Professor Emeritus in 1968, and that same year, the Maxwell Finland Professorship in Clinical Pharmacology was named in his honor. He was President of the Harvard Medical Alumni Association in 1971-1972, and is credited with fundraising more than eight million dollars to endow professorships and support HMS activities and research.

In addition, MF became a Senior Medical Investigator for the Veterans Administration in 1972. He served as an expert adviser to many government agencies at local, state, and national levels, highlighting the dangers of indiscriminate use of antibiotics in the treatment and prevention of disease.

Finland was one of the leading infectious disease researchers in the world. He was a principal investigator and acknowledged authority during the most prolific period in the history of infectious disease research. A meticulous investigator, drug companies and government agencies sought MF's approval for new antibiotics and their clinical application. He campaigned tirelessly against both unscientific marketing of new antibiotics by drug companies, and indiscriminate use of antibiotics in prevention and treatment of disease. MF's scientific contributions included original work on the serum treatment of pneumococcal pneumonia; treatment of respiratory injuries caused by noxious gases and/or bacteria; recognition of the importance of cold agglutinins to the clinical diagnosis of atypical pneumonia; clinical evaluations of major antibiotics such as sulfadiazine, erythromycin, tetracycline, and the myriad of semisynthetic penicillins; and exhaustive studies on how bacteria evolve resistance to antibiotics.

Finland's presence was constantly sought at conferences and laboratories in the US and abroad. At TML, he recruited, trained, and nurtured the careers of hundreds of young scientists. Many of these fellows came from overseas, and many became prominent and prolific scientists in the fields of infectious disease, preventive medicine, pediatrics, and microbiology.

Finland was dedicated to publishing laboratory findings as thoroughly and efficiently as possible. He was author or co-author of over 800 scientific papers for professional publication, and edited works concerning antibiotics, bacterial infections, communicable diseases, and internal medicine. Finland's articles followed a precise structure so that fellows and coworkers could follow consistent standards. Charts MF drew to illustrate antibiotic/ drug interaction were so meticulous and unique as to be given their own name- "Finlandograms." Article topics largely resulted from his original laboratory work and therapeutic trials, and included many aspects of bacteriology, immunology, pharmacology, and virology. In addition, he co-edited the three-volume *Harvard Medical Unit at Boston City Hospital* with William B. Castle, published in 1982-1983. He was a member of the editorial boards of *Antimicrobial Agents and Chemotherapy*, *Applied Microbiology*, *Chest*, *Journal of Infectious Diseases*, *Journal of the American Medical Association*, and *The New England Journal of Medicine*.

MF maintained memberships in many professional societies, including the American Academy of Arts and Sciences, American Association of Immunologists, and American College of Physicians. He was Vice-President of the American Society for Clinical Investigation (1945), Vice-President of the American Epidemiological Society (1962), and first president of the Infectious Diseases Society of America (1962).

Finland received many awards and honors during his long career, including the Bristol Award of the Infectious Diseases Society of America (1966), the John Phillips Memorial Award of the American College of Physicians (1970), and the George M. Kober Medal of the Association of American Physicians (1978). Harvard University awarded MF a Doctor of Science (honoris causa) in 1982. The Maxwell Finland Lectureship Fund, established at his retirement, supported an annual lecture by a distinguished physician in the general fields of infectious diseases, immunology, and preventive medicine.

MF died at Faulkner Hospital in Boston, Massachusetts on 25 October 1987, at age 85. A memorial service was held at Levine Chapels in Brookline, Massachusetts on 27 October 1987.

Scope And Content Note

The Maxwell Finland papers, 1916-2003, record Finland's work as an epidemiologist and academic physician at Harvard Medical School and Boston City Hospital. Most of the records date from 1950 to 1968, corresponding roughly to Finland's most senior years at Thorndike Memorial Laboratory, and are from MF's research and publications, particularly concerning original laboratory work and therapeutic trials. Other records include those from fundraising efforts on behalf of Harvard Medical School, attendance and participation in conferences, meetings, and symposia in the US and abroad, and site visits conducted for the Veterans' Administration.

The records contain information on the evolution and significant changes that occurred in the treatment of infectious disease during MF's career. Also included are articles, certificates, clippings, correspondence, memoranda, notes, patient records, plaques, reports, film reels, videotapes, and photographs from Finland's research concerning a range of subjects related to infectious diseases, but most often clinical evaluations of new antibiotics. Other topics covered in the records include MF's work to secure steady funding for medical research in the post-war era; the growth of his Harvard Medical School research projects, as well as those at the Thorndike Medical Laboratory and Boston City Hospital; and changes that accompanied Harvard's departure from Boston City Hospital in 1973.

Also included is correspondence and records from working with colleagues George Richards Minot, William Bosworth Castle, Charles Sprecher Davidson, and Edward Harold Kass; correspondence with individual's that MF mentored and records from his efforts to both promote their careers and continue personal associations.

Patient names and social security numbers have been eliminated from correspondence, reports, and notes accompanying unrestricted material. Photographs are listed where they belong in the collection. Restricted materials are listed where they appear in Series I, II, III, IV, V, VI, VII, IX and XI.

Collection Inventory

I. Biographical Papers and Photographs, 1916-2003

Date: 1916-2003

Scope And Contents: Series I includes announcements, articles, certificates, clippings, correspondence, invitations, notes, plaques, programs, and photographs from MF's personal, academic, and professional activities.

Arrangement: Series is organized into two subseries: A. Biographical and Personal Papers, and B. Photographs. Photographs listed in Subseries B are housed in box 29.

Conditions Governing Access: Series I contains personnel information that is restricted for 80 years. The end of the restriction period is noted below with each folder.

A. Biographical and Personal Papers, 1916-2003

Date: 1916-2003

Scope And Contents: Subseries A contains announcements, articles, certificates, clippings, correspondence, invitations, notes, plaques, and programs, that are the product of MF's personal, academic, and professional activities. Included are Finland's acceptance letter to Harvard College, scholarship notifications, and undergraduate grade reports. Also includes correspondence from students he tutored in Hebrew over forty years later.

Arrangement: Arranged and listed alphabetically by topic. Oversized materials listed in this subseries are housed in other containers, which are noted after each item. Non-print items listed in Subseries A are housed in box 35. Oversized certificates and illustrations listed in Subseries A are housed in boxes 36, 37, and 44.

Conditions Governing Access: Subseries A contains personnel information that is restricted for 50 years. The end of the restriction period is noted below with each folder.

II. Professional Correspondence, 1929-1984

Date: 1929-1984

Scope And Contents: Series II includes clippings, letters, memoranda, messages, and notes with accompanying photographs resulting from MF's medical practice and research. Most correspondence is between MF and local, national, and international colleagues, and contains reprint requests, administrative discussions, and requests for professional opinions, especially concerning drug studies.

Arrangement: Items are organized alphabetically by correspondent or institution in Subseries A, or chronologically in Subseries B.

Accompanying photographs have been removed and are housed in box 29. Photographs are listed alphabetically in box 29 at the end of each subseries.

Conditions Governing Access: Series II contains personnel and patient information that is restricted for 80 years. The end of the restriction period is noted below with each folder.

A. Alphabetical Correspondence, 1929-1984**Date:** 1929-1984**Scope And Contents:** Subseries A contains professional correspondence between MF and coworkers and fellows, other leading epidemiologists, and the companies for which he conducted research. While most correspondence was created after MF became director of TML in 1963, a smaller section is included from the 1930s through the 1950s. In this section, Albert Sabin discusses their mutual interest in pneumococcus research in 1931, and mentions his budding poliomyelitis investigations, almost 30 years before developing the oral live-virus vaccine. George Richards Minot discussed mundane BCH administrative issues in this subseries, but advised MF in 1931 to "spend as much time as you can with a direct purpose so that everything you do bears on the problem of clinical investigation"- advice that aptly summarized the next six decades of MF's career. Some correspondence contained accompanying photographs.**Arrangement:** Arranged alphabetically by correspondent. Accompanying photographs listed in Subseries A are housed separately in box 29 and are listed at the end of each subseries.**Conditions Governing Access:** Subseries A contains personnel or patient information that is restricted for 80 years. The end of the restriction period is noted below with each folder.

III. Harvard Medical School Records, 1938-1983

Date: 1938-1983

Scope And Contents: Contains correspondence, lists, memoranda, notes, and photographs that are the result of MF's involvement with both alumni reunions and fundraising efforts on behalf of Harvard University and Medical School. Photocopies of checks and check stubs were removed from correspondence.

Arrangement: Arranged alphabetically by folder subject. Photographs listed in Series III are housed in box 29 and are listed at the end of the series. Oversized items listed in Series III are housed in box 36 and 37 and their locations are noted at the end of the item listing.

Conditions Governing Access: Series III contains administrative information that is restricted for 50 years, and personnel and financial information that is closed for 80 years. The end of the restriction period is noted below with each folder.

IV. Boston City Hospital Records, 1928-1983

Date: 1928-1983

Scope And Contents: Series IV contains correspondence, lists, memoranda, reports, and photographs from MF's direct involvement in changes over fifty-five years of the Harvard Medical Unit and TML at BCH. Symposia, conferences, and committee work addressing the 1964 BCH Centennial are especially well documented. There is also a small section of correspondence, lists, and grant material recording MF's involvement with the Channing Laboratory after his official retirement from the TML in 1968.

Arrangement: Arranged alphabetically by topic. Accompanying photographs have been removed and are housed in box 29. Photographs are listed alphabetically in box 29 at the end of the series.

Conditions Governing Access: Series IV contains personnel information that is restricted for 80 years. The end of the restriction period is noted below with each folder.

[Return to Table of Contents](#)

V. Drug Studies and Research Records, 1935-1975

Date: 1935-1975

Scope And Contents: Series V contains research-oriented correspondence, drafts, laboratory notebooks and sheets, notes, patient records, tables, work charts, and photographs resulting from MF's authoritative contributions to antibiotic research over forty years. Experiments followed specific protocol, producing consistent and accurate results. Notebooks and files meticulously chronicle experiments conducted by both MF, and fellows and staff under his direction.

Conditions Governing Access: Series V contains patient information that is restricted for 80 years. The end of the restriction period is noted below with each folder.

A. Drug Testing and Background Records and Correspondence, 1937-1971

Date: 1937-1971

Scope And Contents: Subseries A contains charts, correspondence, graphs, laboratory sheets, notes, and patient records from MF's studies and tests on the viability of specific antibiotics.

Arrangement: Arranged alphabetically by topic.

Conditions Governing Access: Subseries A contains patient information that is restricted for 80 years. The end of the restriction period is noted below with each folder.

[Return to Table of Contents](#)

B. Drug Studies Records, 1943-1975

Date: 1943-1975

Scope And Contents: Subseries B contains correspondence, pamphlets, articles, invoices, notes, charts, photographs and graphs in support of drug studies from the 1940s through the 1970s.

Arrangement: Originally arranged in a series of accordion folders, each accordion folder contained several individually labeled but related folders. These internal folders are the basis for folder separations; title headings were retained. When necessary, patient names have been removed from folder titles. Files are arranged in the exact state and order in which they were received. Accompanying photographs in subseries B are housed in box 29 and are listed at the end of the subseries.

Conditions Governing Access: Subseries B contains patient information that is restricted for 80 years. The end of the restriction period is noted below with each folder.

Carbomycin-Magnamycin, 1952-1953

Identifier: Box 17; Folder 1

Date: 1952-1953

Conditions Governing Access: Restricted until 2033.

Kanamycin, 1957-1965

Identifier: Box 17; Folder 2

Date: 1957-1965

Meningococcus, correspondence and notes, 1970

Identifier: Box 17; Folder 3

Date: 1970

Novobiocin, Experiments, 1956

Identifier: Box 17; Folder 4

Date: 1956

Conditions Governing Access: Restricted until 2036.

Penicillin, BL-P152, Bristol Laboratories, 1959

Identifier: Box 17; Folder 5

Date: 1959

Conditions Governing Access: Restricted until 2039.

Stool Staph Sensitivity and Frog Test for Enterotoxin, 1950-1951

Identifier: Box 17; Folder 6

Date: 1950-1951

Conditions Governing Access: Restricted until 2031.

Comparison of Penicillins (and Levels): Syncillin, 2-Fold Inhibiting Dilutions and FDA Assays, 1960

Identifier: Box 17; Folder 7

Date: 1960

Comparison of Penicillins (and Levels): tabulations, protocols, and FDA assays, 1960

Identifier: Box 17; Folder 8

Date: 1960

Conditions Governing Access: Restricted until 2040.

Comparison of Penicillins (and Levels): Machine Comparison of Penicillins on Staph, 1959-1960

Identifier: Box 17; Folder 9

Date: 1959-1960

Comparison of Penicillins (and Levels): Syncillin and Trademark advance material, 1959-1961

Identifier: Box 17; Folder 10

Date: 1959-1961

Conditions Governing Access: Restricted until 2041.

Comparison of Penicillins (and Levels): Syncillin protocols, 1960

Identifier: Box 17; Folder 11

Date: 1960

Comparison of Penicillins (and Levels): Action of Various Penicillins Against Staph, 1960

Identifier: Box 17; Folder 12

Date: 1960

Comparison of Penicillins (and Levels): Phenethicillin and Falapen correspondence, 1959-1960

Identifier: Box 17; Folder 13

Date: 1959-1960

Conditions Governing Access: Restricted until 2040

Combination and Erythromycin: Erythromycin and Oleandomycin, One-Day Study, 1958

Identifier: Box 17; Folder 14

Date: 1958

Conditions Governing Access: Restricted until 2038

Combination and Erythromycin: Erythromycin and Oleandomycin, One-Week Study, 1958

Identifier: Box 17; Folder 15

Date: 1958

Conditions Governing Access: Restricted until 2038

Combination and Erythromycin: Erythromycin Propionate, Erythromycin Stearate, and Triacetyloleandomycin, 1958-1961

Identifier: Box 17; Folder 16

Date: 1958-1961

Conditions Governing Access: Restricted until 2041

Combination and Erythromycin: Erythromycin Propionate, Children and Adults, 1959

Identifier: Box 17; Folder 17

Date: 1959

Conditions Governing Access: Restricted until 2039

Combination and Erythromycin: Novobiocin/Tetracycline Combination Study, 1957-1959

Identifier: Box 17; Folder 18

Date: 1957-1959

Conditions Governing Access: Restricted until 2039

Combination and Erythromycin: Staph notes, tables, and work charts, 1955-1958

Identifier: Box 17; Folder 19

Date: 1955-1958

Conditions Governing Access: Restricted until 2038

Klebsiella aerogenes, E.coli, Tetracycline, Erythromycin, Oleandomycin, Sera and Types: data measurements, Crossover and Transfer charts, 1957

Identifier: Box 17; Folder 20

Date: 1957

Klebsiella aerogenes, E.coli, Tetracycline, Erythromycin, Oleandomycin, Sera and Types: Antibiotic Resistance and Cross-Resistance laboratory notebook, 1955-1958

Identifier: Box 17; Folder 21-22

Date: 1955-1958

Conditions Governing Access: Restricted until 2038

Klebsiella aerogenes, E.coli, Tetracycline, Erythromycin, Oleandomycin, Sera and Types: E. coli correspondence, tables, and work charts, 1956-1958

Identifier: Box 17; Folder 23

Date: 1956-1958

Conditions Governing Access: Restricted until 2038

Erythromycin and Ilosone, Food and Drug Administration: Ilotycin correspondence, 1952-1960

Identifier: Box 17; Folder 24-25

Date: 1952-1960

Erythromycin and Ilosone, Food and Drug Administration: Erythromycin and Tetracycline Blood Levels, *New England Journal of Medicine*, 1956-1957

Identifier: Box 18; Folder 1-2

Date: 1956-1957

Conditions Governing Access: Restricted until 2037

Erythromycin and Ilosone, Food and Drug Administration: Ilosone, Food and Drug Administration correspondence and reports, 1960-1963

Identifier: Box 18; Folder 3-4

Date: 1960-1963

Conditions Governing Access: Restricted until 2043

Erythromycin and Ilosone, Food and Drug Administration: Ilotycin cases, 1952

Identifier: Box 18; Folder 5

Date: 1952

Conditions Governing Access: Restricted until 2032

Staphylococcus: Strains Collected, 1951-1952

Identifier: Box 18; Folder 6

Date: 1951-1952

Conditions Governing Access: Restricted until 2032

Staphylococcus: Infection Autopsies, 1952

Identifier: Box 18; Folder 7

Date: 1952

Conditions Governing Access: Restricted until 2032

Staphylococcus: Infections, Patients on Antibiotics, work charts, 1951-1953

Identifier: Box 18; Folder 8-9

Date: 1951-1953

Staphylococcus: Patients on Antibiotics, laboratory sheets, 1950

Identifier: Box 18; Folder 10

Date: 1950

Conditions Governing Access: Restricted until 2030

Staphylococcus: Codes, Dr. Haight, 1953-1956

Identifier: Box 18; Folder 11

Date: 1953-1956

Staphylococcus: Staphylococcal Diarrhea, 1947-1951

Identifier: Box 18; Folder 12

Date: 1947-1951

Conditions Governing Access: Restricted until 2031

Staphylococcus: Staphylococcal Dysentery, 1947-1951

Identifier: Box 18; Folder 13

Date: 1947-1951

Conditions Governing Access: Restricted until 2031

Salmonella, Typhoid Fever: A377, Salmonella cases, 1947-1949

Identifier: Box 18; Folder 14

Date: 1947-1949

Conditions Governing Access: Restricted until 2029

Salmonella, Typhoid Fever: Aureomycin and Chloromycetin, 1948-1949

Identifier: Box 18; Folder 15

Date: 1948-1949

Conditions Governing Access: Restricted until 2029

Salmonella, Typhoid Fever: Typhoid Fever cases, 1948-1951

Identifier: Box 18; Folder 16-17

Date: 1948-1951

Conditions Governing Access: Restricted until 2031

Salmonella, Typhoid Fever: Salmonella newington, Epidemic Study, 1950

Identifier: Box 18; Folder 18

Date: 1950

Conditions Governing Access: Restricted until 2030

Aureomycin, Except Salmonella and Typhoid Fever: cases, 1947-1949

Identifier: Box 18; Folder 19-20

Date: 1947-1949

Conditions Governing Access: Restricted until 2029

Aureomycin, Except Salmonella and Typhoid Fever: Urinary cases, Charted and Tabulated, 1948-1949

Identifier: Box 19; Folder 1-2

Date: 1948-1949

Conditions Governing Access: Restricted until 2029

Aureomycin, Except Salmonella and Typhoid Fever: Non-Specific Urethritis, Lymphogranuloma Venereum, Chancroid, 1948-1949

Identifier: Box 19; Folder 3

Date: 1948-1949

Conditions Governing Access: Restricted until 2029

Aureomycin, Except Salmonella and Typhoid Fever: Pemphigus, 1949

Identifier: Box 19; Folder 4

Date: 1949

Conditions Governing Access: Restricted until 2029

Aureomycin, Except Salmonella and Typhoid Fever: Aureomycinase, Terramycinase, 1952

Identifier: Box 19; Folder 5

Date: 1952

Aureomycin, Except Salmonella and Typhoid Fever: Antibiotics and Nutrition, Dr. Jackson study, 1949-1950

Identifier: Box 19; Folder 6

Date: 1949-1950

Conditions Governing Access: Restricted until 2030

Aureomycin, Except Salmonella and Typhoid Fever: Herpes Zoster reports, 1949

Identifier: Box 19; Folder 7

Date: 1949

Conditions Governing Access: Restricted until 2029

Streptomycin, Dr. Harris: Prescription cases, 1946-1947

Identifier: Box 19; Folder 8

Date: 1946-1947

Conditions Governing Access: Restricted until 2027

Streptomycin, Dr. Harris: Resistance, 1946

Identifier: Box 19; Folder 9

Date: 1946

Conditions Governing Access: Restricted until 2026

Streptomycin, Dr. Harris: cases, 1945-1946

Identifier: Box 19; Folder 10-11

Date: 1945-1946

Conditions Governing Access: Restricted until 2026

Streptomycin, Dr. Harris: Meningitis (Except Flu), 1946-1947

Identifier: Box 19; Folder 12

Date: 1946-1947

Conditions Governing Access: Restricted until 2027

Streptomycin, Dr. Harris: H. Influenzae, Meningitis cases (completed), 1946-1947

Identifier: Box 19; Folder 13

Date: 1946-1947

Conditions Governing Access: Restricted until 2027

Streptomycin, Dr. Harris: cases completed, Dr. R. Murray, 1946-1947

Identifier: Box 19; Folder 14-15

Date: 1946-1947

Conditions Governing Access: Restricted until 2027

Streptomycin, Dr. Harris: Urinary Tract cases, prescriptions, 1947-1949

Identifier: Box 19; Folder 16

Date: 1947-1949

C. Laboratory Notebooks, 1958-1975

Date: 1958-1975

Scope And Contents: Subseries C contains laboratory notebooks documenting research conducted by MF and colleagues concerning bacteria and drug studies conducted with rats. Many are of uncertain provenance. Although housed with the MF collection, they appear written in different hands, and are attributed to others, such as Edward H. Kass. Some may be from the Channing Laboratory, where MF worked for the last fifteen years of his career.

Arrangement: Arranged alphabetically by topic.

Conditions Governing Access: Subseries C contains patient information that is restricted for 80 years. The end of the restriction period is noted below with each folder.

D. Disease Research Records, 1935-1978

Date: 1935-1978

Scope And Contents: Subseries D contains annotated articles, bibliographies, case histories, correspondence, patient records, and photographs from MF's drug studies organized around specific diseases and viruses, such as atypical pneumonia, influenza, and viral pneumonia.

Arrangement: Arranged alphabetically by topic. Accompanying photographs listed in Subseries D are housed in box 29 and listed at the end of the subseries.

Conditions Governing Access: Subseries D contains patient information that is restricted for 80 years. The end of the restriction period is noted below with each folder.

Adrenocorticotrophic Hormone (ACTH), correspondence and annotated articles, 1951-1952

Identifier: Box 11; Folder 5
Date: 1951-1952

Atypical Pneumonia and Erythema Multiforme Exudativum, 1942-1948

Identifier: Box 11; Folder 6
Date: 1942-1948
Conditions Governing Access: Restricted until 2028.

Atypical Pneumonia cases, 1948-1949

Identifier: Box 11; Folder 7
Date: 1948-1949
Conditions Governing Access: Restricted until 2029.

Beta Proteus, 1965-1966

Identifier: Box 11; Folder 8

Date: 1965-1966

Cultures, 1970-1974

Identifier: Box 11; Folder 9

Date: 1970-1974

Conditions Governing Access: Restricted until 2054.

Dr. Dans, notes and work charts, 1965-1967

Identifier: Box 11; Folder 10

Date: 1965-1967

Enterococci, 1965-1967

Identifier: Box 11; Folder 11

Date: 1965-1967

G.C., 1966-1971

Identifier: Box 11; Folder 12

Date: 1966-1971

Conditions Governing Access: Restricted until 2051.

Infection Control, 1974-1978

Identifier: Box 11; Folder 13

Date: 1974-1978

Infectious Disease, bibliographies, 1935-1943

Identifier: Box 11; Folder 14

Date: 1935-1943

Influenza, 1949-1950

Identifier: Box 11; Folder 15

Date: 1949-1950

Conditions Governing Access: Restricted until 2030.

Influenza, 1952

Identifier: Box 11; Folder 16

Date: 1952

Conditions Governing Access: Restricted until 2032.

Influenza, 1974

Identifier: Box 11; Folder 17

Date: 1974

Conditions Governing Access: Restricted until 2054.

Meningococci, 1961-1971

Identifier: Box 11; Folder 18

Date: 1961-1971

Conditions Governing Access: Restricted until 2051.

Meningococci, Dr. Burke, 1969-1970

Identifier: Box 11; Folder 19

Date: 1969-1970

Polio, 1955-1956

Identifier: Box 11; Folder 20

Date: 1955-1956

Virus Pneumonia, autopsied cases, 1942-1943

Identifier: Box 11; Folder 21

Date: 1942-1943

Conditions Governing Access: Restricted until 2023.

Virus Pneumonia, case histories, 1942-1945

Identifier: Box 11; Folder 22-23

Date: 1942-1945

Conditions Governing Access: Restricted until 2025.

Atypical Pneumonia and Erythema Multiforme Exudativum, 1942

Identifier: Box 29; Folder 74-75

Date: 1942

Physical Description: 114 photographs

E. Channing Laboratory Research Records, 1949-1965

Date: 1949-1965

Scope And Contents: Subseries E contains correspondence, drafts, and research notes from research conducted by MF's colleagues at the Channing Laboratory (CL); mostly by Anne Bartlett, except where noted. Most material predates MF's official retirement from the CL in 1968, and is authored by others. As with Subseries C, it is possible that these items were added to MF's papers while he was at the CL at the end of his career.

Arrangement: Files are arranged in the exact state and order in which they were received.

Conditions Governing Access: Subseries E contains patient information that is restricted for 80 years. The end of the restriction period is noted on the folder below.

Corticosteroid Excretion in Rabbits and Tuberculosis, Drs. Kass, Hechter, Mou, and Lurie, 1953-1955

Identifier: Box 11; Folder 24

Date: 1953-1955

Conditions Governing Access: Restricted until 2035

Fever, Dr. Kass, 1949-1965

Identifier: Box 11; Folder 25

Date: 1949-1965

Unlabeled notebook, 1964

Identifier: Box 11; Folder 26-27

Date: 1964

Conditions Governing Access: Restricted until 2044

VI. Veterans' Administration Records, 1950-1983

Date: 1950-1983

Scope And Contents: Series VI contains correspondence, lists, memoranda, notes, reports, and photographs resulting from MF's efforts as an investigator and researcher on behalf of the Veterans' Administration for over thirty years.

Conditions Governing Access: Series VI contains personnel information that is restricted for 80 years. The end of the restriction period is noted below with each folder.

A. Veterans' Administration Site Visits, 1973-1980

Date: 1973-1980

Scope And Contents: Subseries A contains notes, itineraries, and correspondence between MF and site representatives documenting visits to and evaluations of established Veterans' Administration hospitals and proposed sites around the United States.

Arrangement: Arranged alphabetically by site location.

VIII. Conferences, Meetings and Symposia Records, 1952-1984

Date: 1952-1984

Scope And Contents: Series VIII contains correspondence, itineraries, memoranda, lecture notes, and photographs from two European trips in 1956 and 1958, participation in the First International Congress on Antibiotics and Chemotherapy in Buenos Aires, Argentina, and ten years of involvement with the Interscience Conference on Antimicrobial Agents and Chemotherapy.

Arrangement: Arranged alphabetically by topic. Accompanying photographs in Series VIII are housed in boxes 29 and 30 and have been listed at the end of the series..

Albert Einstein College of Medicine: Recent Advances in Medical Microbiology, 1979

[Return to Table of Contents](#)

IX. Writings, 1942-1983

Date: 1942-1983

Scope And Contents: Series IX contains articles, book reviews, correspondence, drafts, notes, and photographs documenting MF's publications in professional articles and his work as co-editor of the three-volume *Harvard Medical Unit at Boston City Hospital*, published in 1982-1983.

Conditions Governing Access: Series IX contains patient information that is restricted for 80 years. The end of the restriction period is noted below with each folder.

A. Articles and Speeches, 1942-1983

Date: 1942-1983

Scope And Contents: Subseries A contains MF's published and unpublished writings, correspondence, notes, book reviews, and photographs illustrating his infectious disease research. Article topics include many aspects of bacteriology, immunology, pharmacology, and virology. While some folders contain corrected drafts, the majority do not contain actual copies of articles. In some instances, article titles were obtained from the indexes of MF Collected Reprints, a complete set of which are located in RBSC.

Arrangement: Arranged alphabetically by title. Accompanying photographs in Subseries A. are housed in box 29 and listed at the end of the subseries.

Acceptance of the George M. Kober Medal for 1978 to Maxwell Finland, Trans, 1977-1979

B. *Harvard Medical Unit at Boston City Hospital. Records, 1962-1983*

Date: 1962-1983

Scope And Contents: Subseries B contains correspondence, drafts, and proofs from MF's work on the three-volume *Harvard Medical Unit at Boston City Hospital*, co-edited with William B. Castle in 1982-1983. The series is primarily composed of correspondence recording the recollections of dozens of academic physicians affiliated with the HMU at BCH. Typescript drafts with corrections and photographic proofs of volumes I and II are also included.

Arrangement: Arranged alphabetically by topic. Accompanying photographs in Subseries B are housed in boxes 28 and 30 and are listed at the end of the subseries.

Conditions Governing Access: Subseries B contains personnel information that is restricted for 80 years. The end of the restriction period is noted below with each folder.

XI. Patient Records, 1935-1981

Date: 1935-1981

Scope And Contents: Series XI contains correspondence, charts, and notes concerning patient cases. MF consulted on these cases both through his affiliation with BCH, and through correspondence from doctors and lawyers at other hospitals, who solicited his medical recommendations and legal opinions. A list of specific folder titles and patient names has been placed in the control file.

Arrangement: Arranged alphabetically by name of patient and then chronologically.

Conditions Governing Access: Series XI contains patient information that is restricted for 80 years. The end of the restriction period is noted below.

Patient Records, 1935-1981

Identifier: Box 33; Folder 1-37

Date: 1935-1981

Conditions Governing Access: Restricted until 2061.

Patient Records, 1935-1981

Identifier: Box 34; Folder 1-15

Date: 1935-1981

Conditions Governing Access: Restricted until 2061.

Controlled Access Headings

- Anti-Bacterial Agents--therapeutic use
- Antibiotics, Combined
- Aureomycin
- Boston City Hospital. Harvard Medical Unit
- Chlortetracycline
- Communicable Diseases
- Cross Infections
- Drug Evaluation
