

June 8, 1982

In past months - spoke on engagements of

- ① Federation Meeting - New Orleans
- ② New York Academy of Science - NYC (Fishman)
- ③ Cornell - Irving Wright Symposium
- ④ Was elected to American Association of Pathologists
- ⑤ Pastour paper appeared in May 27 Nature
(to editorial: Science → June)
- ⑥ The paper - certainly work speaks clearly,
could explain mechanism as yet.

It dawned on me today (why not before?) that in O.R. I can care for only one patient at a time but new lab work has reached the point where it ~~will offer~~ may benefit thousands of patients - (an opportunity not given to many surgeons).
