C. RES NOTES

- 1) My goal : to become good surgical teacher in O.R.
to advance surgery some in lab.

Therefore I will be more interested in teaching men on my service than in devpuring for my self all the operations I can possibly do.

In return for this I will expect certain cooperation from the service etc

-Complications and infection to absolute minimum or we will spend so much time in caring for there there will be no time to learn new surgery.

To HMs, interns etc

I hope no patient will suffer
because one of us tried to protect our pride

If you want advice on anything you are unsure of
don't barge ahead - get more senior
help (I will certainly have no hesitation
in asking visits).

Grand Rds ask both
head nurses to
sit end of 1st &
2nd row at G.R.
