[1830]

My dear John — I received yours, of the I
forgot what date, duly, and take it now upon me
to reply so far as concerns the Park. I believe your
reason is a sufficient good one for not carrying up
a stock — though our case differs from yours in as much
as we cannot get good park here at all. There is
no such thing to be had. However we eat too little
to make it on the whole worth while. — I fear I
shall not be able to lend a penny more to you
this year. I shall just make both ends meet on
the 1. of Jan. But next year, God now got
fairly started I shall with doubt, si fata non
ferunt res de quibus non vult capere, lay up
4 or 5 hundred. — I have just your lost in
the Canine, for yours I doubt not it is, & look upon
it as full of the most just discrimination & sense:
in all things. But the fanatics will not
like it as

you seem to anticipate. And the same unpardonable
blackguards who persecute all the lawyers of the Unitarians
concerning the Bidel's insurrection, will do the same kind
office of yours in the matter of intemperance. I look
upon the leaders of the orthodox as a wicked - dis-
honest, lying, slandering, calumniating, backbiting,
anti-republican (anti-democratic) race. There is no truth nor
fairness in them. They are in one word real Jackson
men.

You may or may not have heard, that we
have another addition to our family from the 3rd of
November, - not to far from being well. But Mary
is fine. - Have you read Madden's travels in
Turkey &c? A Physician. - and his Musselman, both
well worth reading. Anastasius, Haddji Bala & the
Musselman are immortal trio. - Give my love to
Helen & Helen use as ever
affecting you Mr. William.

How can I move you? Let us know when you
do, that we may know where to think of you.

John Ware

Ware - Fall of 1830.

May 31, '32

Mr. Dean John - Can you advise anything
for our baby now 18 months old. It has in ad-
dition to its original difficulty a liver complaint.
An enlargement of it - feels very hard - & protruded
almost in front. The child gains nothing but rather
loses. Yet its spirits are good - sometimes seems to
suffer pain in the region of the organ, but generally
is lively & playful - & a little abilitate. We are
giving it - { Dr. Pulteney's order - blue pill. It
has come through one abilitate of it before
& we think: the liver was reduced for a time
but it is now larger than ever. - I am
wondering anything different? Do you think this
disease has any connection with the other - its
obstructed passage? & can anything be done for
that besides the use of large bougies? - I know
no case the child can live unless something is
done to get it along beyond what has been. - We
think somewhat of going to Philadelphia with it to

Dr. Deanees - wh: can we do in that time & at
small expense? Do you think we'd gain any-
thing? - Dr. P. is a good Dr. for more but ground
diseases - he seems to take no interest what^r in
chronic cases of this sort; we can hardly get
him to look at the child or feel of it, or prescribe
anything - (this entire word) In a critical case of
epilepsy & wh: a rough a man's whole faculty
I'd go to him as soon as any Physician here - but
not, in any child's file of ours. - Let us
leave you a word when you can. - I
hope to send you some money again in July.

I must go a word to Helen.

My dear Helen - About your seal - I know
you are in it - it is done - but it is no such thing -
You must know which kept it a week or so be-
fore I got it - & the difficulty of selecting a design
has been almost staggering. I cannot choose
I find for another. I have looked at a good de-
signs but cannot select one. Some I'd have
taken but the seal was too small - others are
too common. Give me some positive directions.

Will you have a motto on it? & what? - or
 you prefer an antique head - or - a modern
 foug like a dove flying with a letter - or the crest
 of a coat of arms, with some motto appended?
 It is almost impossible to find any letter foug
 design which is not common place. An antique
 is always good - & a crest always quintessence!
 & as pretty as anything. What is the crest of the
 Sinclair family? - The wave crest, is
 a Dragons head with a broken
 spear thru it. Signifying that
 the family have contended with
 the devil & beat him.

Ecco. - You know how designs

must be working small. - If you will state it
 any smaller be it show you multitude of letter
 of the kind, which might suggest something to you.
 You must give me some directions.
