

October. 15. 1813. -

15. Mrs Spool much better neither vomiting nor purging
appetite right, skin natural, pulse weak & good spirit
no pain in stomach nor sourness.
15. Sarah Ann Hood. better in appearance and disposition
less fretful. Does not say she is no... colour coming. picks her
nose yet. Stool about natural. appetite good. No med
food well digested.
15. John Hood. very well abating flesh.
15. Mr Carter. edema better, and stronger -
15. Kelly Agnew quite sound & blue eyed.
15. Ellen Chester. Surge operated stone copious by little pain
twice last night once this morning. sore & pain relieved
leg more easy and more easily moved. complains of no
pain, wonderful. particularly the worst which could
no be touched. Looks bright. 15
15. James Chester. Paraplegia. In the almshouse & under many
Physicians. received no relief. recommended cold water -
15. Leg as before. shooting pain, something
like a subcutis imperforata. scratching her foot
the ankle joint cracks, is weak. Advise cold water -
poured on. not to the sore. commence the bandage from
the foot & gradually tighten. tighter about the foot.
still, quiet.
16. Mrs Ann Carter much better, edema diminishing, pain
good appetite & stronger.
16. Alexander, worse. fever in afternoon, very severe, less better,
lays torpid, no appetite, this morning cold not very
pulse quick &c.
16. Isaac very bad less last night sick at stomach. Nature's
16. Ellen Chester much better walks, talks, laughs, one stool this
16. Mrs Spool much better. down yesterday, no complaints.
Lose Dec Lumb & back. Lino. ride & walk -

Intermittents above Broad St and in the outskirts of
the town & the vicinity, fevers & vomits come generally.

Much Rain during this part of this month.

Very fine

Rain and cool.

October. 16th 1813.

16. Joseph. lifting barrels sprained his wrists, could move both yesterday but today not the left, swelled & very sore in the joint of the union between the radius ulna and the scaphoides lunare: the end of the radius slightly displaced upward and forward. Not reduced warm fomentation and plasters of salt chalk. Sattu Zi shed tears.
17. Ellen Chester much better, walk & use regular - Volatile Liniment.
17. Chester Vaccinated indurated - doubtful.
18. Sarah Ann Hood convalescent some swelling. legs getting
18. Mrs Ann Carter much better. edema stationary. Carbonate of Soda. grs X. effloresced.
18. Alex. F. very bad. low week, relax very bad. legs feverish much soon go pale. Land: Dec. Pul Chir. & warm bath palliative not curative.
18. Isaac F. better. recovering by the powers of nature only very slowly, refusing all medicine. appetite less -
18. Ellen Chester, not so well, purge Puls: Rhiz grs xv. & c. vig
The tumor in neck & wrists increasing more painful.
18. Mrs. Spruel better lively, no complaints. save edema for which I intend Carb. Soda. grs X in 5 doses -
18. Joseph much better from salt & chalk poultice & c.
19. Mrs Spruel better. Discontinued Bark & other medicaments. Edema great. Carbonas Soda; grs X. 4 this day & one tomorrow. No complaints.
19. Mrs Ann Carter, better Edema reduced by the two powders Carb: Soda. Pills Discontd. recurrence very much swelled generally yesterday & very sick after the Soda, perhaps not that.

1850

Fever running into Typhoid state - Little sickness.
according to Drs. Hewson, Parrish, Stewart & Chapman

Snow & cold.

October. 22^o 1813

22. James Chester. Paraplegia. Attended by many
recommended cold water. Use Vol Liniment &
he now moves his legs. Con't both.
23. Mrs Spool not so well from getting on her affairs, but
may otherwise be considered much better. Continuing
pills & Decoe. Ancho & a Serp.
23. Ellen Chester. better altogether.
23. James Chester. his limbs are no more moved by water & Valhins
Continue severe friction. pouring of cold water & moving limbs.
23. leg very painful. swelled. runs a little
Cold poultice to part. Sulp: Pagar 3i.
23. Isaac Floyd. better walk from Carpenter St to
to Christian or Front and is much better. lax well
23. Alex. Floyd. not better, must soon leave us.
24. W. Ann Carter sick at stomach. pain in her back.
Edema stationary. Requires U.S. pulvis terre calc
25. Alexander Floyd. better, more quiet: relax better. full
and thinner if possible. emaciated to the extreme
25. Isaac much better pain in his side, cough & Cax.
25. W. Ann Carter. better: swelling the same, sometimes
in the bowels; pain in the back. Pills continue strong
U indicated by pulse. full hard tense. vigorous.
25. W. Spool. better. altho, been getting has injured her.
Pain in her legs, in warm bath no good, grew worse
immediately. Edema slight: Dec: Linch: Pill Silla.
Oleo Senebini. embrocation. broth if he
can bear it. Had a fever as she said. onion or Poter
may have relieved it.

wrist & swelled: neck better. Emp. Epispastic 2 by 2
to wrist. ℞ Pulv. Rhiz ℥ij. in Beer ℥vi.
Min. Coch. dno: frequenter sumenda.

25. Chester scaled head Tania capitis. Yar cap-
inruption on face. 2 wine glasses of the Rhubarb & ^{vaccina: full}

25. James Chester. leg better. continue cold water & Vol. &

25 James Johnson. troubled with Hematuria. and
his wife leaving him: Delirious. pulse active hard
Pain very great in head. veins turgid. restless &
wild. voids urine frequently. No blood this
evening. Red sweat: skin now dry. Eyes inflamed
with red blood.

October 25 1850

Very little thunder and lightnings this summer.
October has been unusually unpleasant, rain
dull, cloudy, muddy wet, misty, drowsy murky.
Some high winds, some mild days and
some quite cold - ice frost killing vegetation
autumnal foliage is as beautiful as spring
flowering. Rheumatism Intermittents, lillians
tertian and quotidian. Cataracts.

rain a little all day at night violent: people
look dull & feeling languid.

October 25th 1813:

leg very painful swelled. probed but no sinus that I can discover. but deep fistulous opening. Cold Poultice Salt well operated - skin smoother hand & I suspect exostosis.

26th Ellen Chester better. blisters drawn. smarter.

26 James Chester getting better. nose movable ex. creases his hand much. Con.

26 Mr Spruel better fever and pain not returned, suspended Onions & Water. Diet & contin.

26. Matilda Cloyd. better no fits: no stool, no sweat. legs getting pulse active. Con.

26 Wright swelling in face from teeth. porent & drawn if well. Cold ~~to~~ ^{enough} blisters by a day. Cold poultice - Purge Dulc. Rhei grxx. Sub. Mur. Hydrag: grs. viii. acetatis Alumbi.

26. James Johnson. as well as ever. oblivion of his suffering

26. Leg sometimes better & sometimes worse cold Poultice, pain & stinging. swelled hand yet. differs Bleeding. sore in spots. yellowing also in spots & hand as bone in spots.

27. Matilda Cloyd much better lively. looks more of a natural colour. none all yesterday. Sleeps well appetite good

27. Wright. face legs swelled. purge operated only once this morning. don't like taking it. some leg red from cold poultice.

27 Ann Carter flown.

27 Mrs Spruel not so well sickness of stomach retching and throw off of water. not mearum nor byle -

Rec. 10th Nov^r D. 1813

Observation for October.

This whole month has been wet & disagreeable for
 in which the whole day has been fair. Afternoons
 generally overcast & rain in evening. Violent showers
 now and then: last night considerable. Fevers gen^l
 intermittent tertian & quotidian of unusual obstinacy.

October 20th 1813

28. Alexander Floyd better smiling on the arms of yepim Death emaciated beyond description. yet the faculties bright, and the temper sweet. paled as the cricket & lively as it when is chirrup in the hearth.
- 28 Isaac J. better improving in body & has now got under sail with jynmast & shattered spars
- 28 Ellen Chester better. blister dried. apply on the inner side and keep open with *Polia brassicae stracea* or poultice.
- 28 Mrs Sprood. much better; oedema considerable. soreness no other complaint. bowels stomach mouth eyes skin - all right
- 28 Matilda Floyd much livier. stools not since yesterday before rising. double the quantity of Mag. Mix^r. to lukewarm bath. Nut & et.
- 29 Mrs. Sprood had so well. fretting about my bill. worried head ache. stomach full. says she would take emetics. Mag mixture.
- 29 Elizabeth Albert. leg easier for two days: but still after the old sort.
- 30 Isaac J. not so well, but driven by an obdurate father to the wharfs to lug wood home. Eminent wretch; he has made a heart of himself and will destroy his children by his inhumanity. What can a Physician prescribe when this is the case.
- 30 Alex. J. better and I suppose from the sedative effect of opium
- 30 Ellen Chester: not so well sick all yesterday & better today Epileptic: cont. Blister run. & poultice to it.
- 30 James Chester. with cold water & friction of Vol. Sini. and exercise is recovering.
- 30 Mrs. Sprood. no so well. pain in head & oedema about eyes & eyes. Nuc. Mix. for head and stomach. Decoc. Cinch. & Iris: *Serpentaria*. contin. on account of her regular levers, at night an head aches.

1850

Last part of this month has been remarkably healthy. Dr. a lesson.

Pretty cool but fine

recidiv indigestique male.

Mr. Sprad. from Oct. 28. 29. 30 Nov. 1. 2. 3. 5. 6. 7. 8. 9. 10. 11. 12. 13. 14. 15. 17. 19. 20. 20. 21. 22. 22. 23. 24. 25. 26. 27. 29. 30. Dec. 1. 2. 6. 7. 8. 10. 11. 12. 13. 15. 16. 17. 18. 20. 21. 22. 23. 24. 25. 26. 27. 28. 29. 30. Jan. 1st 2d. 3. 4. 5. 6. \$60.

October 30th 1853.

30. Matilda Lloyd. about the same fretful nights & sleepless. made water several times. stools the same yesterday. Spiced Rhubarb & mag. mix^o. today her belly transpired. eruption about the same. perhaps Osora. lotion & friction.

Nov. 1st Ellen Chester about the same. dull blisters drying up. Con^o. Rhubarb.

1 James Chester. can kick. Con^o.

1 Mr. Spruel. had a bad night, sick at stomach head ache, inula palpitation about the ears, heat flushing, fever commenced about 10. o'clock & continued restless till morning. edema not so well about the face. and eyes, which are sometimes complained of. tongue natural. mouth in a good condition, moist, pulse more perceptible - Looks stronger
Pill Scill. stop.

1 Matilda Lloyd. better bright & smiling. coughed in the night. sleepless. some suspicion of her having had cantharum to quiet it, from Mr Wright, the former nurse. Stools becoming more natural stomach less tumid. urine free. appetite very good.

2 Ellen Chester. dull & indolent pulse active & blisters dried. wrist swelled as before. not sore. bowels regular. Find the glands of the neck, axilla. groin swelled & indurated. The Epileptic disease has resolved itself into an inflammation of the glandular system. I would keep up the discharge from the part & use mercury. pulse active.

November 2^o. 1813

2. James legs getting better much. a fortnight ago could not move his legs.
2. Mrs Spaul had night, fever sickness. This morn^g vomited yellow bile & looks stronger. no appetites. Discontinue all medicines at her request.
2. Sarah Ann Hood. no better. as pitiful. pale as ever. wish to give her Hemlockⁿ. Camphⁿ. Kino & Cincho. and Pill^a calomel et opi. John. cont^d well.
2. Matilda Lloyd. better as yesterday full thin.
2. Rose Chesicles. first in the face - head; then the eye. and in raised blotches in the hair, to which eye meal & flannel. Bowels have been bad for a long time. Bleem Ricin no good. Sul^a Soda. ℥j. Oculinum. Tea hot & bed.
3. Isaac Lloyd, leg pained from injury and the other from byles: Tubercles. Still doing by a miracle father to labour much more than his strength will admit. Pain in head and his eyes bad.
3. Alex. F. much better. almost a skeleton. sinking in the arms of death. Appetite all his functions perfect save digestion.
3. David. glandular swellings. in right groin sore. Puls. Rheu Xgr. et Cal. Xgr. —
3. Ellen Chester not so well all day yesterday. glandular swellings general & increased. unit as before. The other a little swelled. pulse very ac^tive & quick, jerking. Bowels regular - ℥ss. ℥vi. Pill^a Hydrag. .xxv. Cal. Resin. .xxv. Pills. .vi.

1813. 2. 10. 1813

Faint, mostly illegible handwriting in the upper section of the page, possibly containing dates and names.

Fine healthy weather. not disagreeably cool.

Extremely faint handwriting in the lower section of the page, likely bleed-through from the reverse side of the paper.

1813

November 3^o. 1813.

3^o James still continuing and getting much better trying how high he can kick.

3^o Mrs Spool. Discontinued every thing and is much better. Here see the power of the imagination. Emplastrum Vix Burgundi. U. by H. few flies.

3^o Matilda Lloyd. R. Haematoxylois Campechi-
anum ʒi. Pulvis Cinchonae officinalis ʒij Kinost.
et. d. R. Sublimis Hydraz. grs. xv. Opium ʒv
Pill. Min. xv. ft. b. d. about the same, restless
a night & fretful by day. brightness of the eyes.

3^o Rose. Head much better. No
Satts. continue yet. R. Sulp. Sod. ʒj.

4th Ellen Chester. about the same, pulse reduced. slept
quietly, tongue a little foul. dull fixed countenance
Pill. Min. Pills.

4 James Chester continues the paroxysm of water dis
much better. moves & kicks

4 Matilda Lloyd. Menstr. Ranges very much. only one
dose of Section. 3^o. this day & no pill in morning

4th better, Satts well; Eruptions much
better. all part relieved.

4 Johnson. about a fortnight was hit by the
shin of an hhd. in the epigastric region, painful
and cause Hematuria & purulent discharges. On
the 25th ulto. very bad (See 25th ..) Every since some
pain & blood & purulent discharges. continue. Satts
to last several days. Stomach very foul. Emetic
requires. the vomits almost every morning. ʒo grs.

4th Ellen Chester, not so well. as before generally gland
more swelled. continue

Fine weather,

November 5th 1818.

5th James Chester continues pouring water & using
the liniment that he is much better. 3 weeks
ago he could not move his legs at all now he
kicks & skuffs about but can't walk or bear
his weight. Con. standing & exercise.

5. Mrs Spool much better. The idea of medicine
has cured her & relieved her. imagination is a
noble preventer of horrid sufferings.

5. Elizabeth Albert. Leg worse for want of the
old poultice. which given. Anemic to some
and Picuta. Intend.

6. Matilda Cloyd. better but purges very much with
Dea^m.

6. Isaac. better. near well: eyes still bad. glandular S.

6. Alex. v. I seem as if he would be cured. Still hat^e
costive. lively. smiling.

6th David was purged severely & much better.

6. Ellen much better. playful. Father still improving

6. Mrs Spool. not so well. sickness & vomiting this
morning. has exercised some dit better on the
whole. I advised to cont. 13. Dec. by Will Squill.

My 7th Matilda Cloyd. altho med. suspended. Dark^a contin.
Sand^m. - old woman much better -

My 7th Mrs Mc Ray. Physis Pulmonalis. night sweats
cough. no sleep by land^m. altho cough is quieted.
Sand^m. 40 qts. no effect. tea spoonful. never
expectorated blood. mucopurulent. pulse not
very weak as would be expected from her great
debility. yet yielding would bear U.S. Frictions.

1844

Faint, illegible handwritten text, likely bleed-through from the reverse side of the page. The text is arranged in approximately 20 horizontal lines across the page.

November 8th. 1873.

- 8th Mrs Sprad better. all night oedema legs. sorely upon pressure. sickness of the stomach yesterday.
8. Matilda Lloyd better. cap. sloped. Miss Cook. S. D. 5th Land
8. must better quite well.
- Matilda Lloyd better.
- 10 Mrs. M. Kay. about the same. cough has become faint always in sternum. voice variable & inability to lay up the left side. and once a fast pain in it. pulse not very low. Easily fatigued. Lays down frequently. no appetite can't bear animal food
- 10 Ellen Chester better. glands swelled. bowels regular. very fretful & worries much.
- 10 James Chester. much better. can move his legs very well & his joint weak. exercise to continue: feet.
- 10 Mrs Sprad better. no complaint now hyperic pain in her back passing into her heart & accompanying palp.
- 12 Ellen Chester. much better. glands yet swelled. purged by the cold Spices. James. much better.

November. 19th: 1813.

- 19th Matilda Lloyd. Diarrhea continues. Rectoria. Juleps
19. Mrs M^c. Hay. slight cold, more cough, but little
using. Molassi. Brandy & Laud. m.
20. Ellen Chester, glands continue swelled, and increasing
bowels open, almost. Diarrhea. Father improving
- 20 Mrs. Sprad. morning Emetic operated well - by 11 in
large quantities bitter &c. much weakened. oedema
tarsu eyelids. legs legs. no appetite. pulse feeble skin
hot, moist clammy.
- Evening 9 o'clock. Had been very weak all day
found her in bed stupor. Delirium. pulse small
bubble. mouth natural. skin hot, febrile, some
times dry & at others moist. Give Brandy Sody-
afterwards. Brandy. Gum. Arab^c. Sach Alb.
Deco. Cinchi. Sulp. Ars. & Kino^m. of which she took
during the night one lb. Ammoniac aqua. Zij was
added. High fever & continued till terminated
in copious sweating. Continue the same this day
with Decⁿ. Cinch^c. Ars. Sulp^a. Limon. Gum Arabic.
21. Matilda. Lloyd. Diarrhea stopped. by Rectoria^c Juleps.
resum Decⁿ. Log^a. Kino. & Opim Duct. H. d. Min Cub
21. Afternoon, Mrs. Sprad. better. cold sweat. no appetite.
Continue Med^c. Bark &c. pulse still small & jerky.
- 22 Mrs. Sprad. no better weak and low pulse active
& full when first touched and might be supposed in-
flammatory. but pulse however slight indicates the
typhoid state. Hot skin & oedema of the eyelids De-
lirious. Sulp: Soda ʒjss. Continue. Val Juleps & Gds
Simplicis.
- 22 Matilda Lloyd. better Diarrhea checked. Cont. Sin
crease.

No^r. 22^o 1813.

22 Mrs. Spruel (well) not so well sleepy and dull
pain in her breast upon coughing. She says that
she is so weak that she is obliged to rest when she
spits & coughs. Sinapium operated much & feet
looked blue instead of red at first. afterward red
but not generally. complained of smarting thro
evening. One passage to day about night fall. pulse
not full to the first touch, but still typhoid.
Thin hot sometimes cold clammy sweat tongue
white but moist. complains very little but weak.
refs. Blister 5. by 5. to the Epigastrium. Cont^e.

Sunt. Spii 30^gth. at 10 o'clock. Frictions.
conversation, because she is delirious, and re-
quires the stimulus of friends & circumstances.
Complains of pain in her head & a beating.
Breathing somewhat difficult, particularly
after small exertions. Subcutis tendorem
says she has no hopes for herself. Much more
rational than when I entered by the exhibition
of brandy with opus. Arab^e. Val: alk: &c &c.

23 No better. Con^e. Med^e. pulse less soap bubble
Evening much better. The pupils & Nerve says
she is now & them yellow. Continue. Deaf-

Ellen Chester. nose well dull. swelled glands
swelled alveolar. pulse reduced. Dact
Lancelotti. & virus Scap^a. Rinnarson 3-38-39

James Chester case stand alone & moves with
great freedom, & is very well save the weak
in the lower. Exercise.

Very wet for many days. warm generally -
most. little rain. none violent these two days
a few fair days these three weeks - one or two
days about a week since very cold. Catarrhs
prevalent. Typhus, and more frequently Typhoid
diseases for some time since.

November 24th. 1813.

24 Hematuria. placebo. a contraction about
the parts perian. after a running.

24 Mrs Spruel, much better. con: nothing remarkable
Frictions. oysters. Milk punch.

24 Jane Graft. Relief allay as Mrs Gylkeys, about
8 weeks since put her arm out of joint, was set
or pulled upon. Now out of its place, upon the edge
of the glenoid cavity, back ward & above. Pulled by
two men & went in as I thought. bends her arm
better, Pain in the biceps humeri, which was
before tense, now relaxed. Val: Liniment Ziv.
for Friction. Laud^m - Zi - q^{ss} 30. to the shoulder.
Bandage under the elbow as suspensory, pushing
the head of the humerus into the glenoid cavity.
Passing over the shoulder. Another about the
body to retain the other in situ propria.

R. 30. quite smart and active for that age -
Should hardly have attempted anything
after 8 weeks had I know her age which
much deceived me. her conversation was
such. Weakness & a flabbiness of the
muscles as if they were inactive. This
induced me to ask her age & it unmade
the mystery of flabbiness.

25 better not much pain. slept well

25 Mrs Spruel. better. veniated: milk punch
potter. soap de Court.

25 Malinda Clowe better. double dose -

11th Fine warm weather.

12th Fine weather. comfortable.

13th Cold very.

November 26th, 1813.

- 26th Mrs. Sprad better in all respects, up yesterday
and below. Con^e. - Nutrientia.
- 26th - Jane Graft. much better. little pain & sleep less
27. Matilda Lloyd Diarrhoea stoppt. proper coloured
in state quo. evacuated. q. d. immo coel. s. s.
27. Jane Graft. much better. little pain. shoulder
joint very well as to appearance. moves it up
to a line horizontal. Tric. Val Lin^t.
27. Ellen Chester. dull. fretful. emaciated. pulse weak.
tongue white. glands not so much swelled.
Diarrhoea better since. and something of the ap-
pearance of worms come away. Pupils rather
large.
27. James Chester. much better, is steadier upon his legs;
the muscles from long disease have lost the
power of supporting his limbs. Con. Nutrientia.
27. Mrs. Sprad. much better. lively and walked
many squares yesterday. vomited her food entirely
Con^e. with Tric. Nutri^t: of Iron q^{ts} 10. b. d.
- 29th Mrs. Sprad much better, lively, little appetite
Con^e. Cinch. & Aris.^a. Mrs^e Iron q^{ts} 5. Suetum
and nourishing diet. Good cheer.
29. Jane Graft. very much better. moves considerably
29. Matilda Lloyd. in state quo continue.
29. Mathew Carpenter. anchor fell upon his right
foot, over the metatarsal bones of the three longest
toes. much bruised & jammed. cut more
his great toe. maybe broken. Appl. Tinct Opio
& q^{ts} 30. Delivum. hands clinched.

weather cold and fine.

Disease here been intermittent. Syphard.
Typhus. Miliar. Eruptions. swollen faces.
and glands. weather generally wet &
disagreeable. cloudy but I think upon
the whole little rain. Healthy.

Time dry but cool. sheets filled with ~~Q~~!

Cooldest day we have had.

Nov. 30th 1813.

30. Mathews. 12 foot alley. Sniffing of above 5th - regular
had night, much pain. no sleep. cannot de-
termine whether any fracture. Ointment.

30. Mr Spool much better. had day yesterday
sickness &c. Con. all med. but Diet.

30
Dec^r December 1st 1813.

Matilda Lloyd better. con.

1 Ellen Chester. ribs and abdomen tenderified
Bulo Rhis gr^{ss}. and Cal: viij.

1 James Chester improving fast - can now stand

1 Mrs Spool much better. vomited thru morning
walk out & pretty good appetite continuing
& humor her stomach

2 Mrs Jane Graft. much better some pain in
spinning.

2 Mrs Spool better, weakness in the back. all things
right & no vomiting.

3 Mathew Carpenter. had two very bad nights after
his injury. but foot is not suppurating. Ointment con-
Laud^m q^{ts} 30. Salt Z^{fo} operated.

6 Mrs Spool. much better. all so lively.

7. Mrs Graft. more pain and not more movable
costine. Sal Glaub. Zij as may be fitting. Val^d Zij end.

14 Samuel Carpenter. more pain in great toe. had
rest. suppurating very well and granulating.
Laud^m. upon the partice. at night 25th
Partice more extensively over the foot & great toe.

Mercury an Internal

Sialagogue

Cholera Infantum - D Miller -
Jamaica - in obstinate cases
at night a few grs. morning a
purgé, proceed all with Sul
Ammoniacae. Petitions Fever

Cynanche trachealis Idiopathica
in the forming stage - with
Epeace - certainly a nauseating
compound. Some have given
enormous doses -

Guanche. Maleg. to salivate
purgé & vomit.

Scarletina Anginosa, with
Epeace & Turpeth mineral
with Galap & Rhubarb -
sometimes Prun - Corrosive
sublimat as a gargle.

Rheumatism, sometimes
yield to nothing else, particularly
when obstructed -

Nerves cure acute Rheumatism.
without something else
Syphilitic Rheumatism. Dover
powder. arsenic. Great
affinity to gonorrhoea, if any
thing like Ven. use mercury.

Gout according to some
with opium. Amblyopia us
Hemiplegia

[Faint, illegible handwriting, likely bleed-through from the reverse side of the page. The text is mirrored and difficult to decipher.]

Emetics

Cephaelis Emetica

Cephaelis Ipecacuanha. before
Callicocca Sp. Dose 5. 6. 7. 9. 10. 13
or 3ij. infusion, powder, wine

Asthma - to nauseate as a general
relaxant or antispasmodic. It will
produce asthma.

Hysteria. same action.

Pul Consumption - Dose 9grs or 1gr
great attention always to Diet

Hemorrhages. great advantage
in - relaxes. they are passive or from
high action

Uterine. - small Dose
Lead Acet. Blisters to feet -

Ipecac acts on the nervous system.

Depositing 17 Centuries - Cruentus.
Excellent 2 or 3grs in 24 times 24h.

Rheumatism acute. Dose powder

opm ʒi. Ipecac. ʒi. sal potash 1ʒ
Dose 10grs.

Hummercrania. Doopy amara
as diaphoretic -

Spec. in the best emetic -
prompt in case of Lung disease of
laudam. It obtains the power
of the narcotics

Intermittent - Colic Hepa
tical - passage of Gall stone -
has induced salivation -

Spiraea Treplicata. XV Chap
Tossandria 597 - chiefly bark
& root. - difficult to distinguish
them - Spiraea reginae twice
the quantity 20 or 30 grs

Asarum Europaeum Colto font
wild ginger. Intermittent
but we have better things
popular for Pestiferous. 15 grs 3/4

Nicotiana Tobacum -
infusion 31 - to 34. Bellion
Spec. sometimes when no other
medicine vomits, large quantity

apoplexy from laudanum.

Externally, with vinegar & Brandy
accites the stomach, even vomits
certainly has great effect -
& has expelled worms.

Digitalis is Emetic, but never given
as such but then it never produces
good without nauseating & even vom-
iting. - said to be a component of the
Kau Med. or the Keratom album
Eletarium

Scilla Maritima Dried is more
potent 4j or equal to 20j. Juice
never emetic or without nauseating
Angina & Pneumonia

Polygala Seneca expectorant.

Pneumonia, where V. is not called
for. Gnanche trachealis

Is recommended highly in -
asthma.

Sanguinaria Canadensis
very much like Poly. Seneca

Sequoia, Mustard Thos. radix

Sinapis
trigon

exhausta
Amoracia

Mineral
Emetics. Super. Sul. of Copper - Dose - ʒ
ʒ. ʒ. ʒ. 20 - good judgment

Copper
Consumption, supposed a tonic
emetic - ptosp swallow this
solu. Sul. Cop. immediate vomit

Potrolic Solution. White
Vit. ʒiij - also ʒi for more
if you wish to purge or more of
you do -) Cochineal, mixed with
water lbs. take spoonfull.
washed a tea spoon.

Consumption & Dysentery.

Arsenic never does good without
producing some narcotizing
effect -

Serpent's Mine - sub sulphate
Merz. Precipitate the sol. solus
by water. *Cynanche trachealis*
Dose ʒj for child. ʒss for adult

Squills of Serpenth. Drying
particularly *Hydrothorax*

Dose Serpenth ʒj. Scilla ʒss

Muriate of Mercury. Corrosive
solution so as to keep a constant
nausea seratus.

Antimony. all preparations
are Emet & Scaphor.

Fast Emetic

Equal parts ~~of each~~ of each
fixed ~~or~~ or glass of water
with super tartrate of potash -
solution - crystals -

Dose ʒi. ʒss

Dissolve in water - ʒj & take
spoon full every 15 minutes
for sometimes ʒj will vomit
but at others ʒj will not.

In over Dose of Iod. Iod. pro-
trates the system -

Cynanche Inaabealis has
sometimes fail, not certainly
to good as Copper Iodine -
mucous -

Wine of Antimony -

James's powder supposed
to be a Phosphate
of Lime & Antimony -
not certainly known

Dose 5 gr. 20 -

Experiment to prove its
descriptions, supposed to
produce nausea, prostration
frenzy of skin. Diuresis -
whiny - and certainly
eruptions. sometimes
better than blistering

External use in Consumption -
Pulver.

Injection of solution of $\frac{1}{4}$ grs
in $\frac{3}{4}$ water brings back
Gonorrhoea -

Pneumetic Hydrothorax -
D'Arson's Division of
Emetics is into

Vegetable &
Mineral

Miscellaneous fumes -
feather. Hiding on horse back
sea voyage, sea sickness -

Cathartics.

Stimulants. They increase
the peristaltic action, act on the
whole part of intestines & extend
to other viscera; Diminishes the
pulse. Do they pass into the
circulation

Doses vary according to season
person state, climate constitution &c

Emulsion Indian in red lead
(this range) as purgative - Chastelais.

Dr Barton

upon. Institutes & Practise.

Cerealia Davys Philosophical Agriculture.
Mr Davy supposes lime & other things to
be drawn up into the vascular system of
the vegetable and not organised.

Lime & Peps stimulate the manures &
increase putrefactive process

The Carcasian mountains has clouds of
mist hanging about them that are of
Lime Stone and prognosticates the state
of the weather.

woods more solid growing upon lime
& the contain most lime. Limes building
Light is nutritious. Palid becomes the
prisoner & the celeris plant

Mr Kroll experiment upon Plants
living without any thing but water
growing all the usual ingredients of
veg.

Blackness of Indians & Africans arises
in some measure from light because the
infants are not black & will not become
so is preserved from it.

Four varieties of Man Caspian
European European American &c
Mongolian. Tartar Chinese Lap
landers - American &c. very large
Molays. Black hair Equine
nose. Hindos. East Indians.
Ethiopian - African.

Light has a great influence upon ger-
mination regarding it. Seed in a
cabinet in the light. Potatoes in the
England 20 feet distant from a
small hole in a cellar sprouted
only on that of the light & extended
itself 20 feet & came out. So there
is no perceptibility in plants. The Lupine
follows the sun with its palmate
leaves - Light promotes absorption
The Hyacinth in the light will
absorb more water than one in the
dark, here is evaporation to be con-
sidered. The petals of a plant
when first pushing out white, when
more exposed to light a red streak
pushed down the outside & being
there shut the inner side of them
had no red streak, till they fell off.

Fungi are most always white. Some in caves
In mines where a beautiful red. as the Agar-
icus minimatus. like red lead. should
disappear upon admittance of light it rather
drys, doctos, the air & thus they are in vis-
ible like fungus, oxygen has perhaps
nothing to do with it, by stimulating
too highly. Sepulchrum cross may be
kept green by a candle. Paeonia obovata
gives a most delightful odour in the
night but not in the day. Carbon is given
out at night or in the dark in plants.

Light allows quality. Digitalis is in
action if it grows not in the shade -
more sugar from the Palm tree in day
than night is it so in the sugar maple
Try to keep Digitalis patients in the dark
at least the absence of the stimulus of
heat will be beneficial as the pulse is
about 96 & 100.

As near I, than any life independent
1807
upon organization.

1813. In the stomach of an ostrich we found
lbs of pebbles & iron

Taste is a modification of touch -
a transparent reticula over the eyes of birds.

Coluber Barus was probably the species
of Viper Ables Feritana experimented
upon (Col. Viprinus).

Animals get the salt licks not only to
drink water but to eat earth. All animals
probably seek condiments. All nations
Icelanders are less salt than any. The In-
dians all used & in some there of ashes of
certain vegetables containing potash
& the same there with the wood sorrel &
Sumach berries. Some teeth of the Icelanders
depend upon the equality of food. Dubito.
Capsicum is the most excellent of con-
diments because it is most soluble
& soft of its vertebrae contains parts
Bancroft (His. Guiana) cured his gut
with it & eat table spoons full.

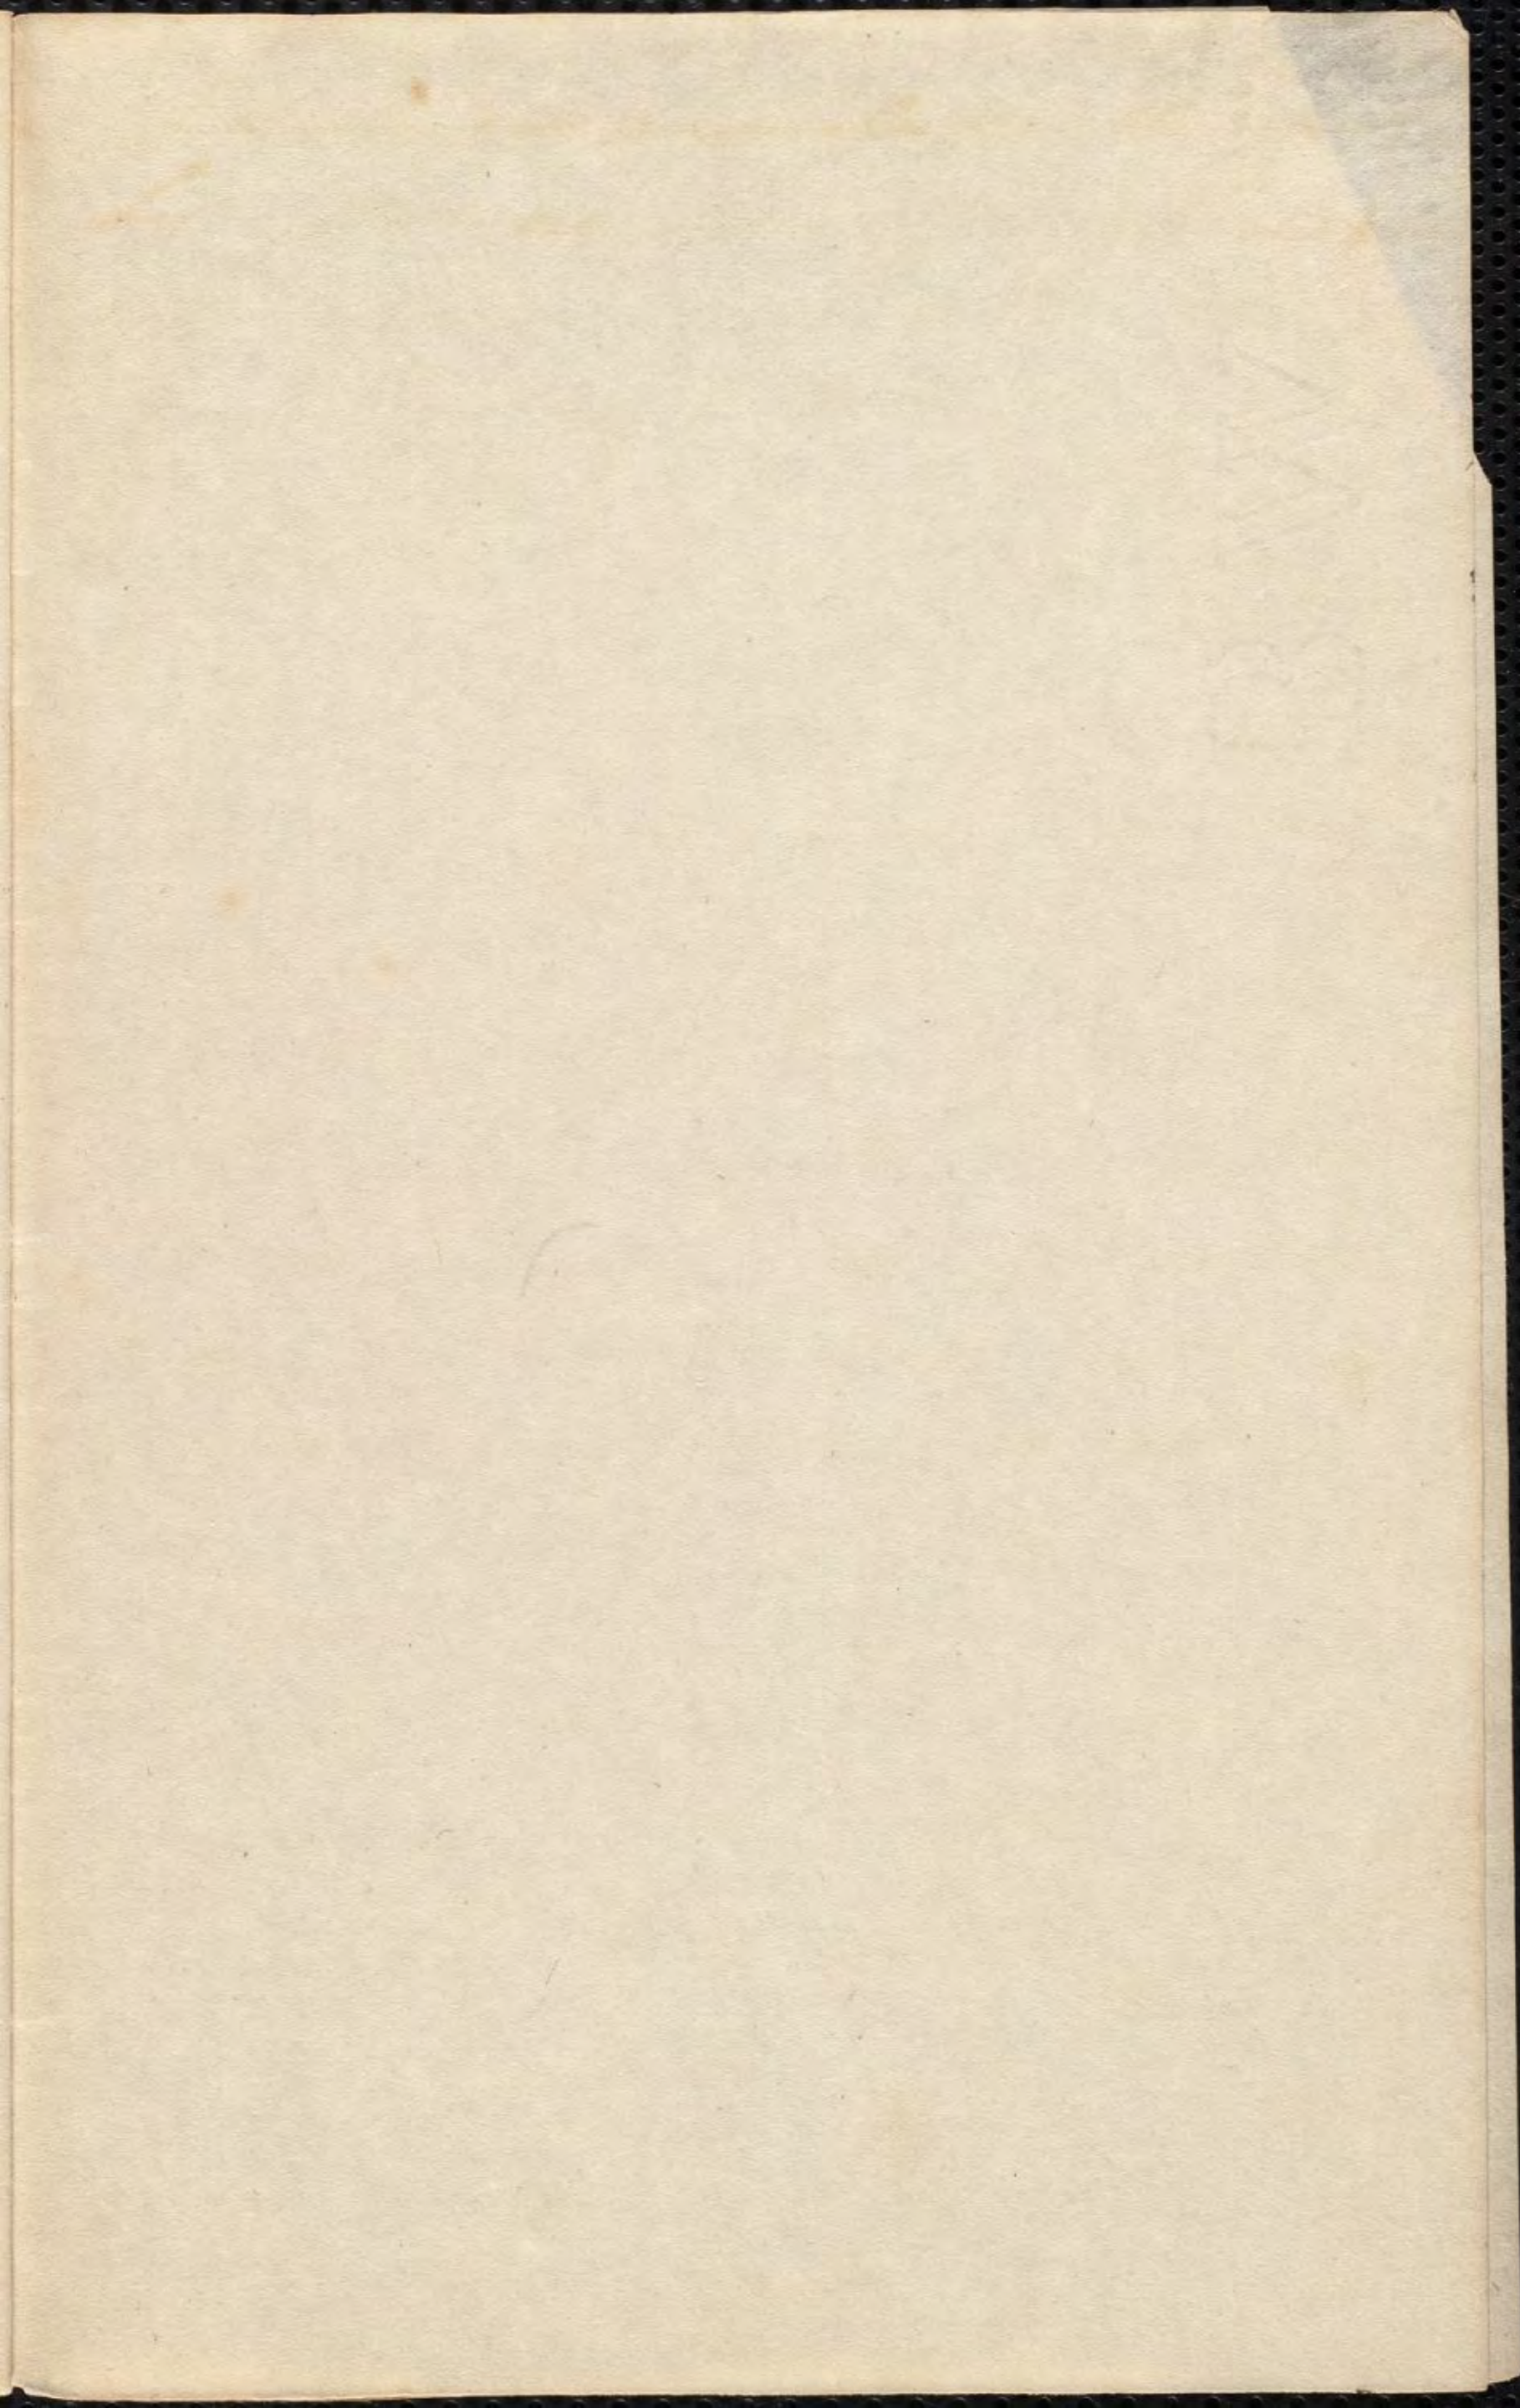

The Natural Food of Man. Is
herbivorous: both that & omniv-
orous from his teeth & medium
length of his intestines. The Rabbit
has an immense tract of intestines
they lay along side the mesocolon
in a curious manner.

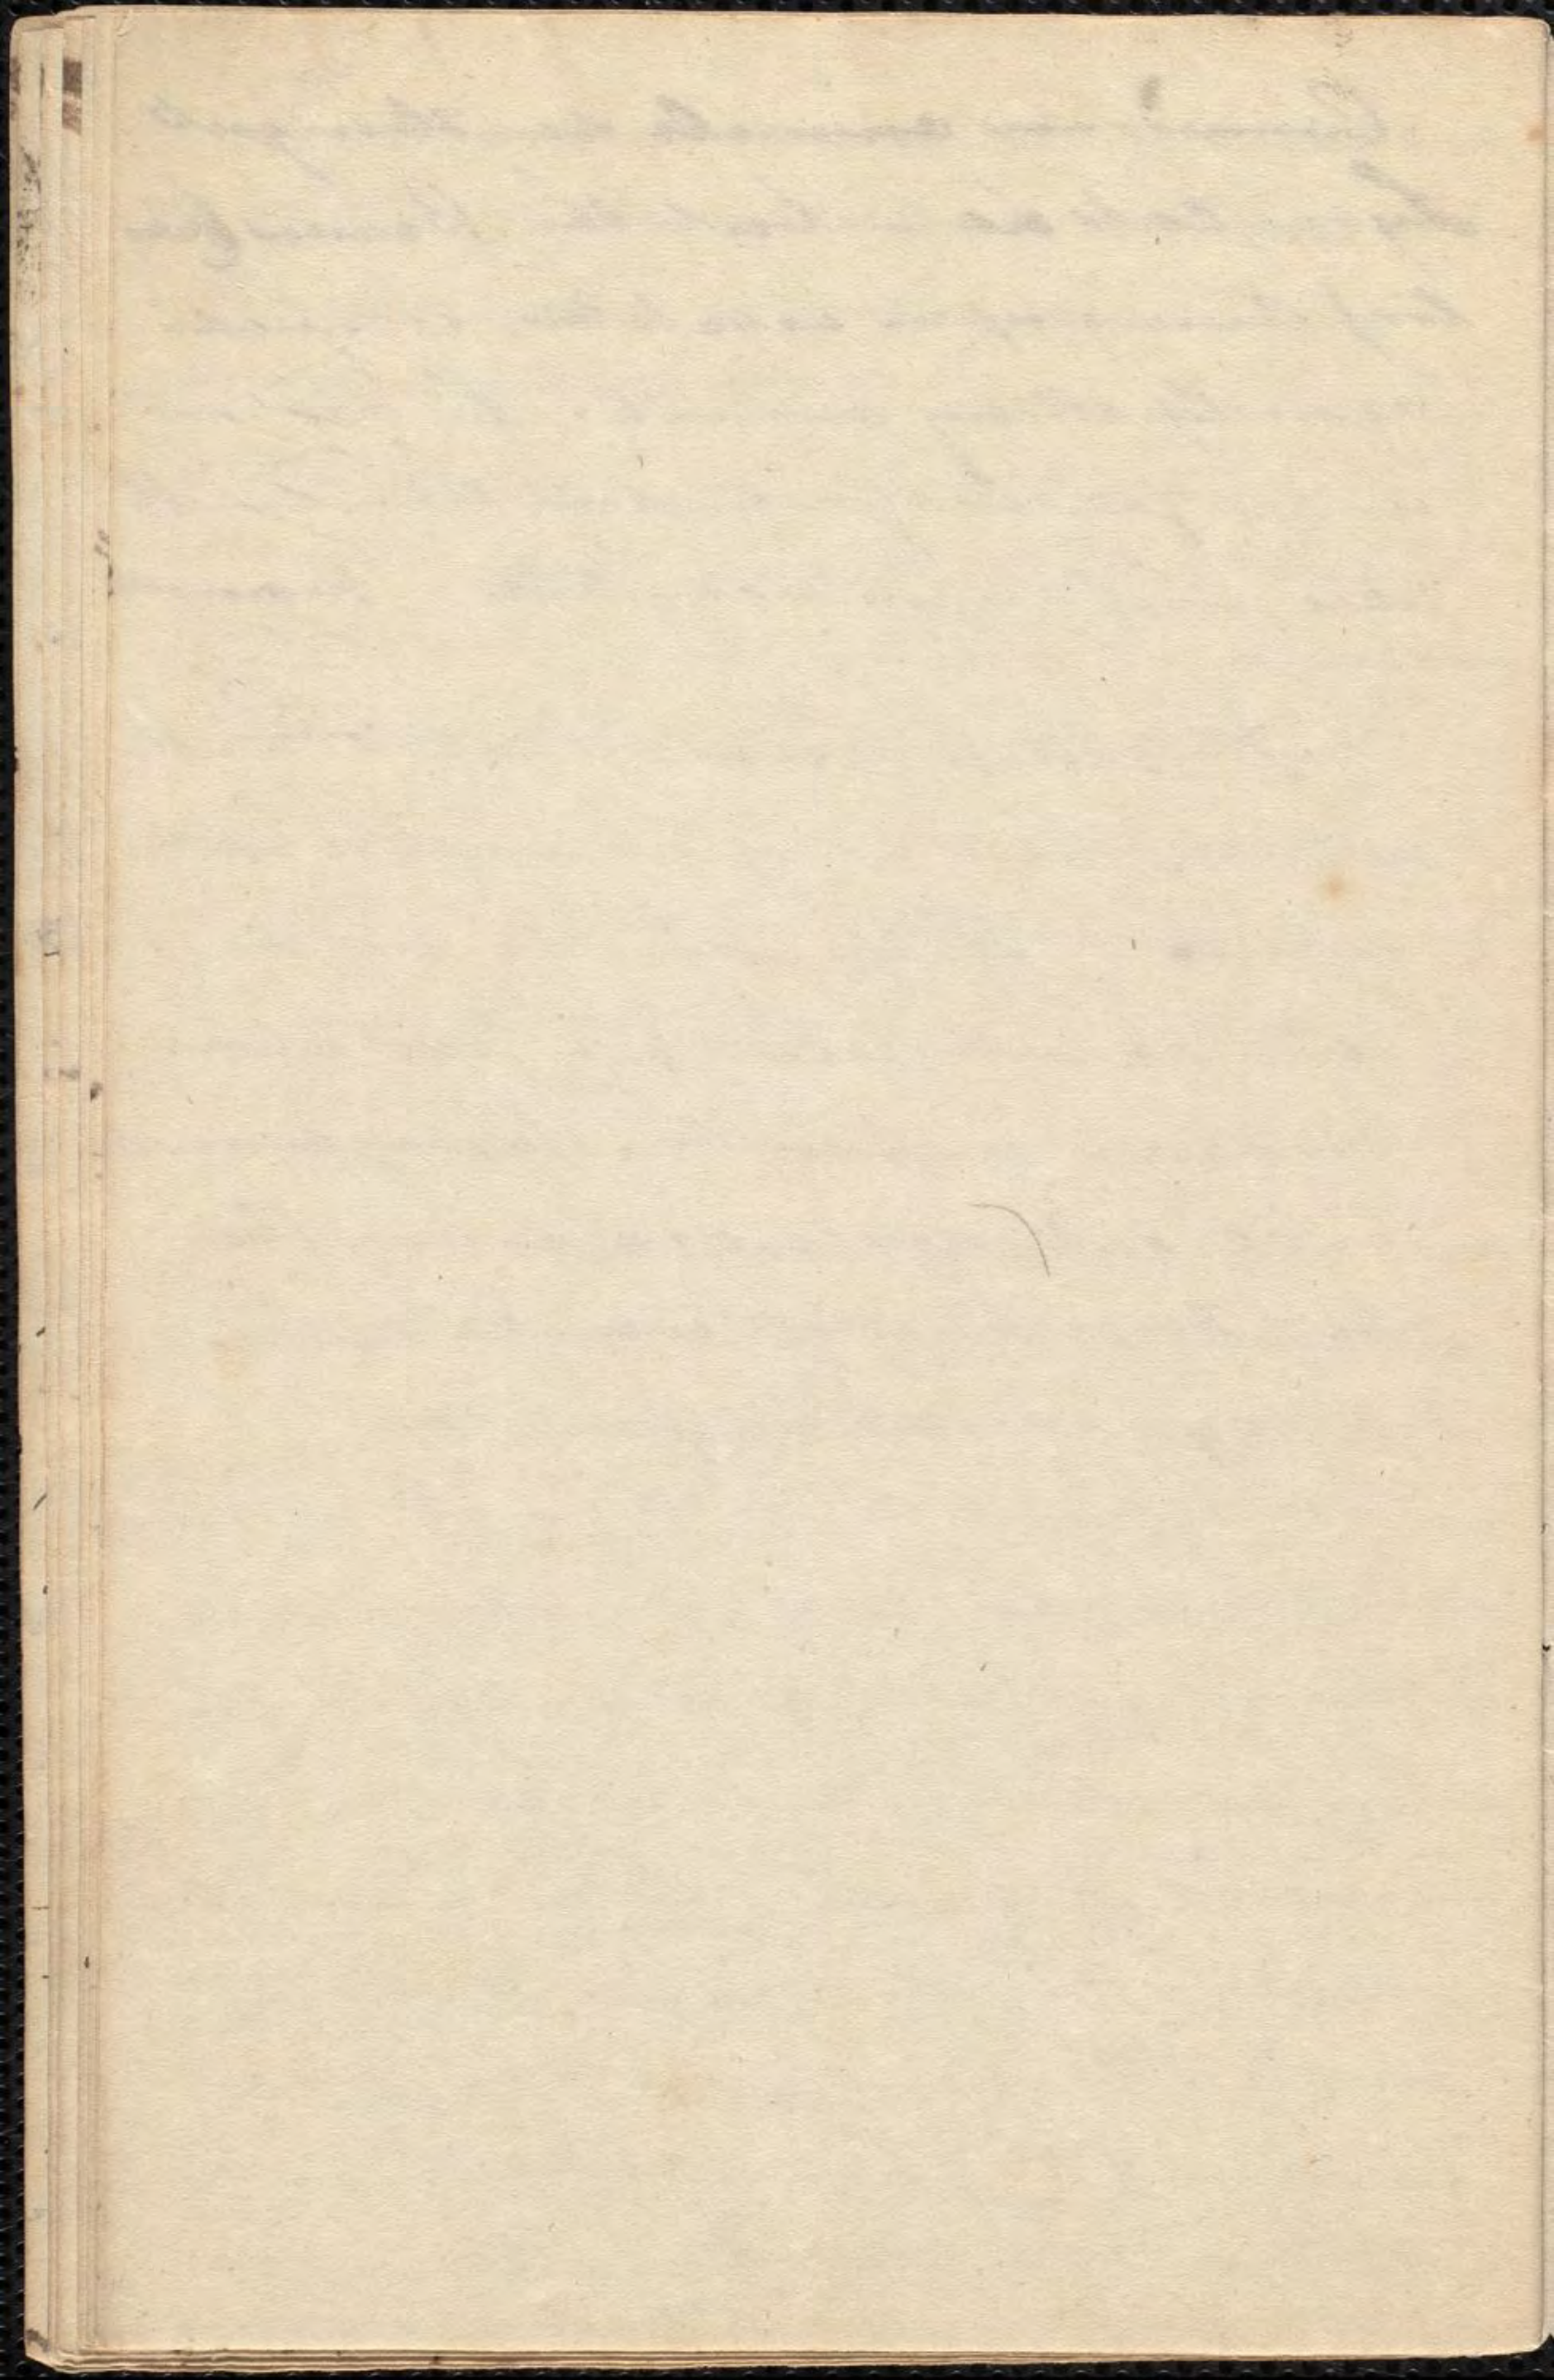

The wise Spaniard Pediceros will not eat the possum because it has a stink. The Monkey has longer canine teeth than man & hence they other fanged very like his & have them covered with enamel. But they are not carnivorous. Marmot is granivorous & has the same enamel (exterior). Leas altho carnivorous has a strong touch of intestines. The medicine they inhabit gives a less disposition to putrefaction.

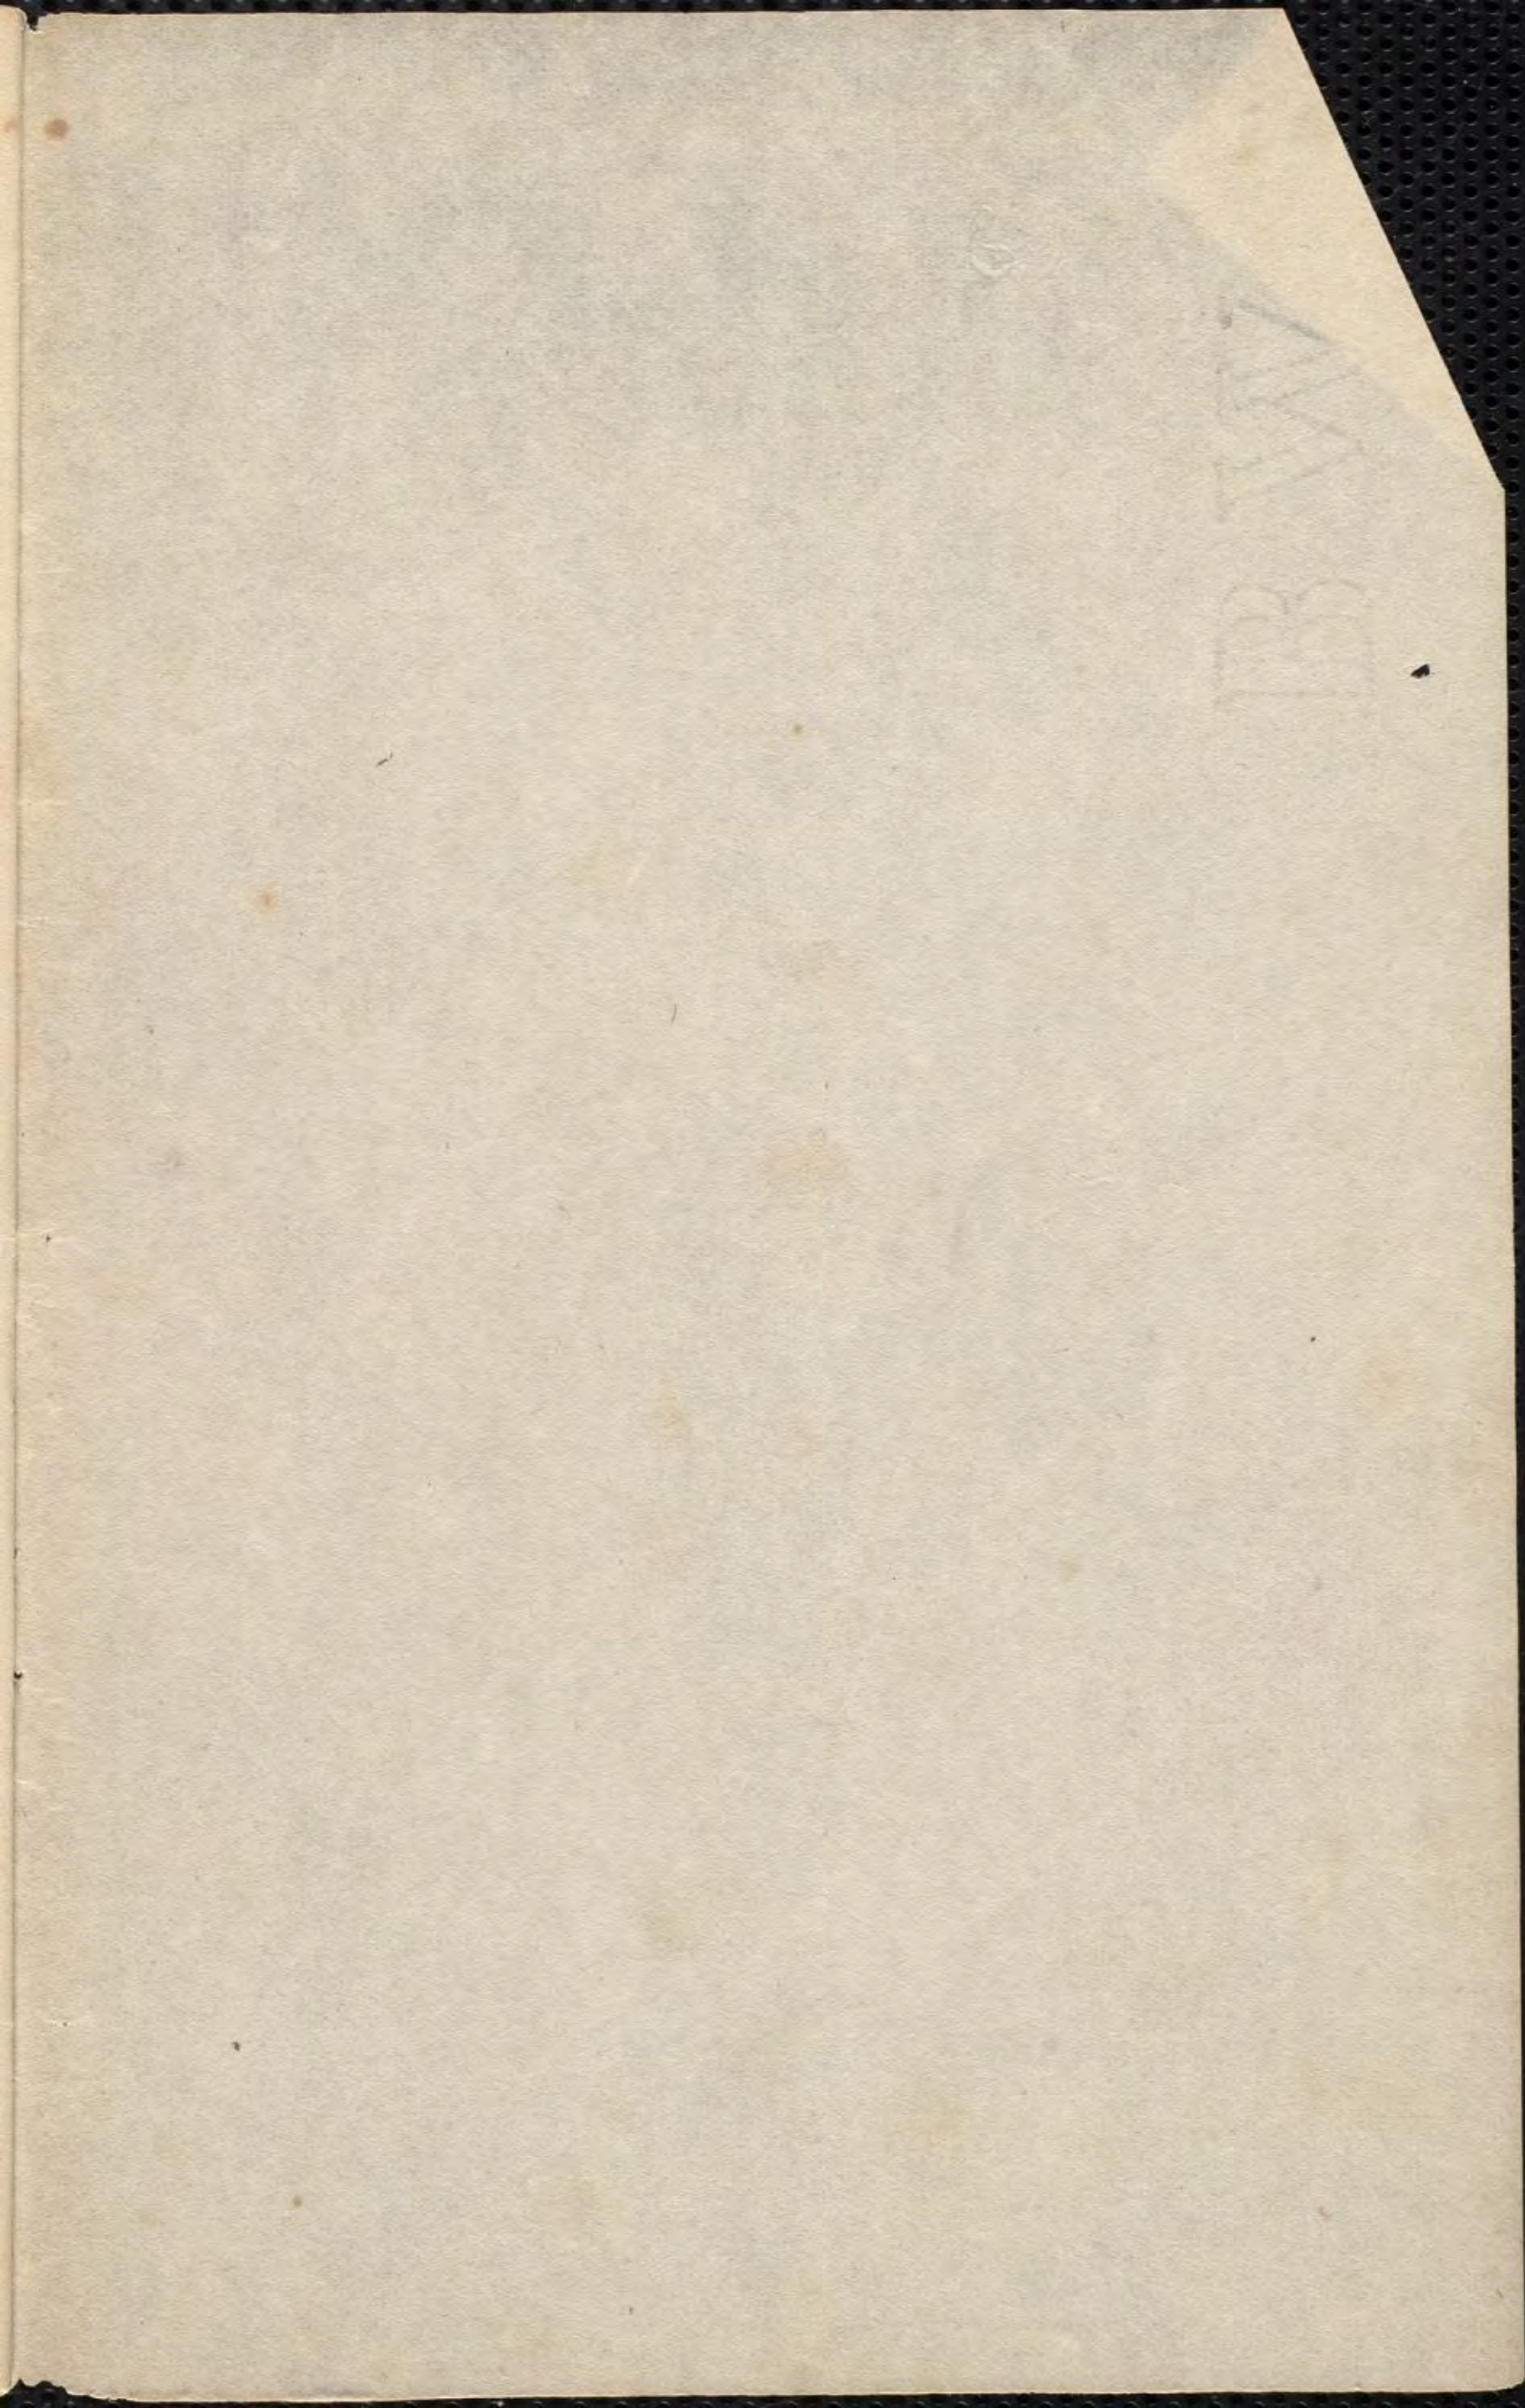

Nations never acquire the proper spirit & natural character until they eat every thing. We must eat every thing to be come a great & powerful nation, we must require the fruits of the earth to be brought in by our seamen & then by commerce & trade. Thine was a monstrous meat eater & was brightest after it & usually composed after it. Newton calculated best with a stomach of vegetables. Palton eat every thing

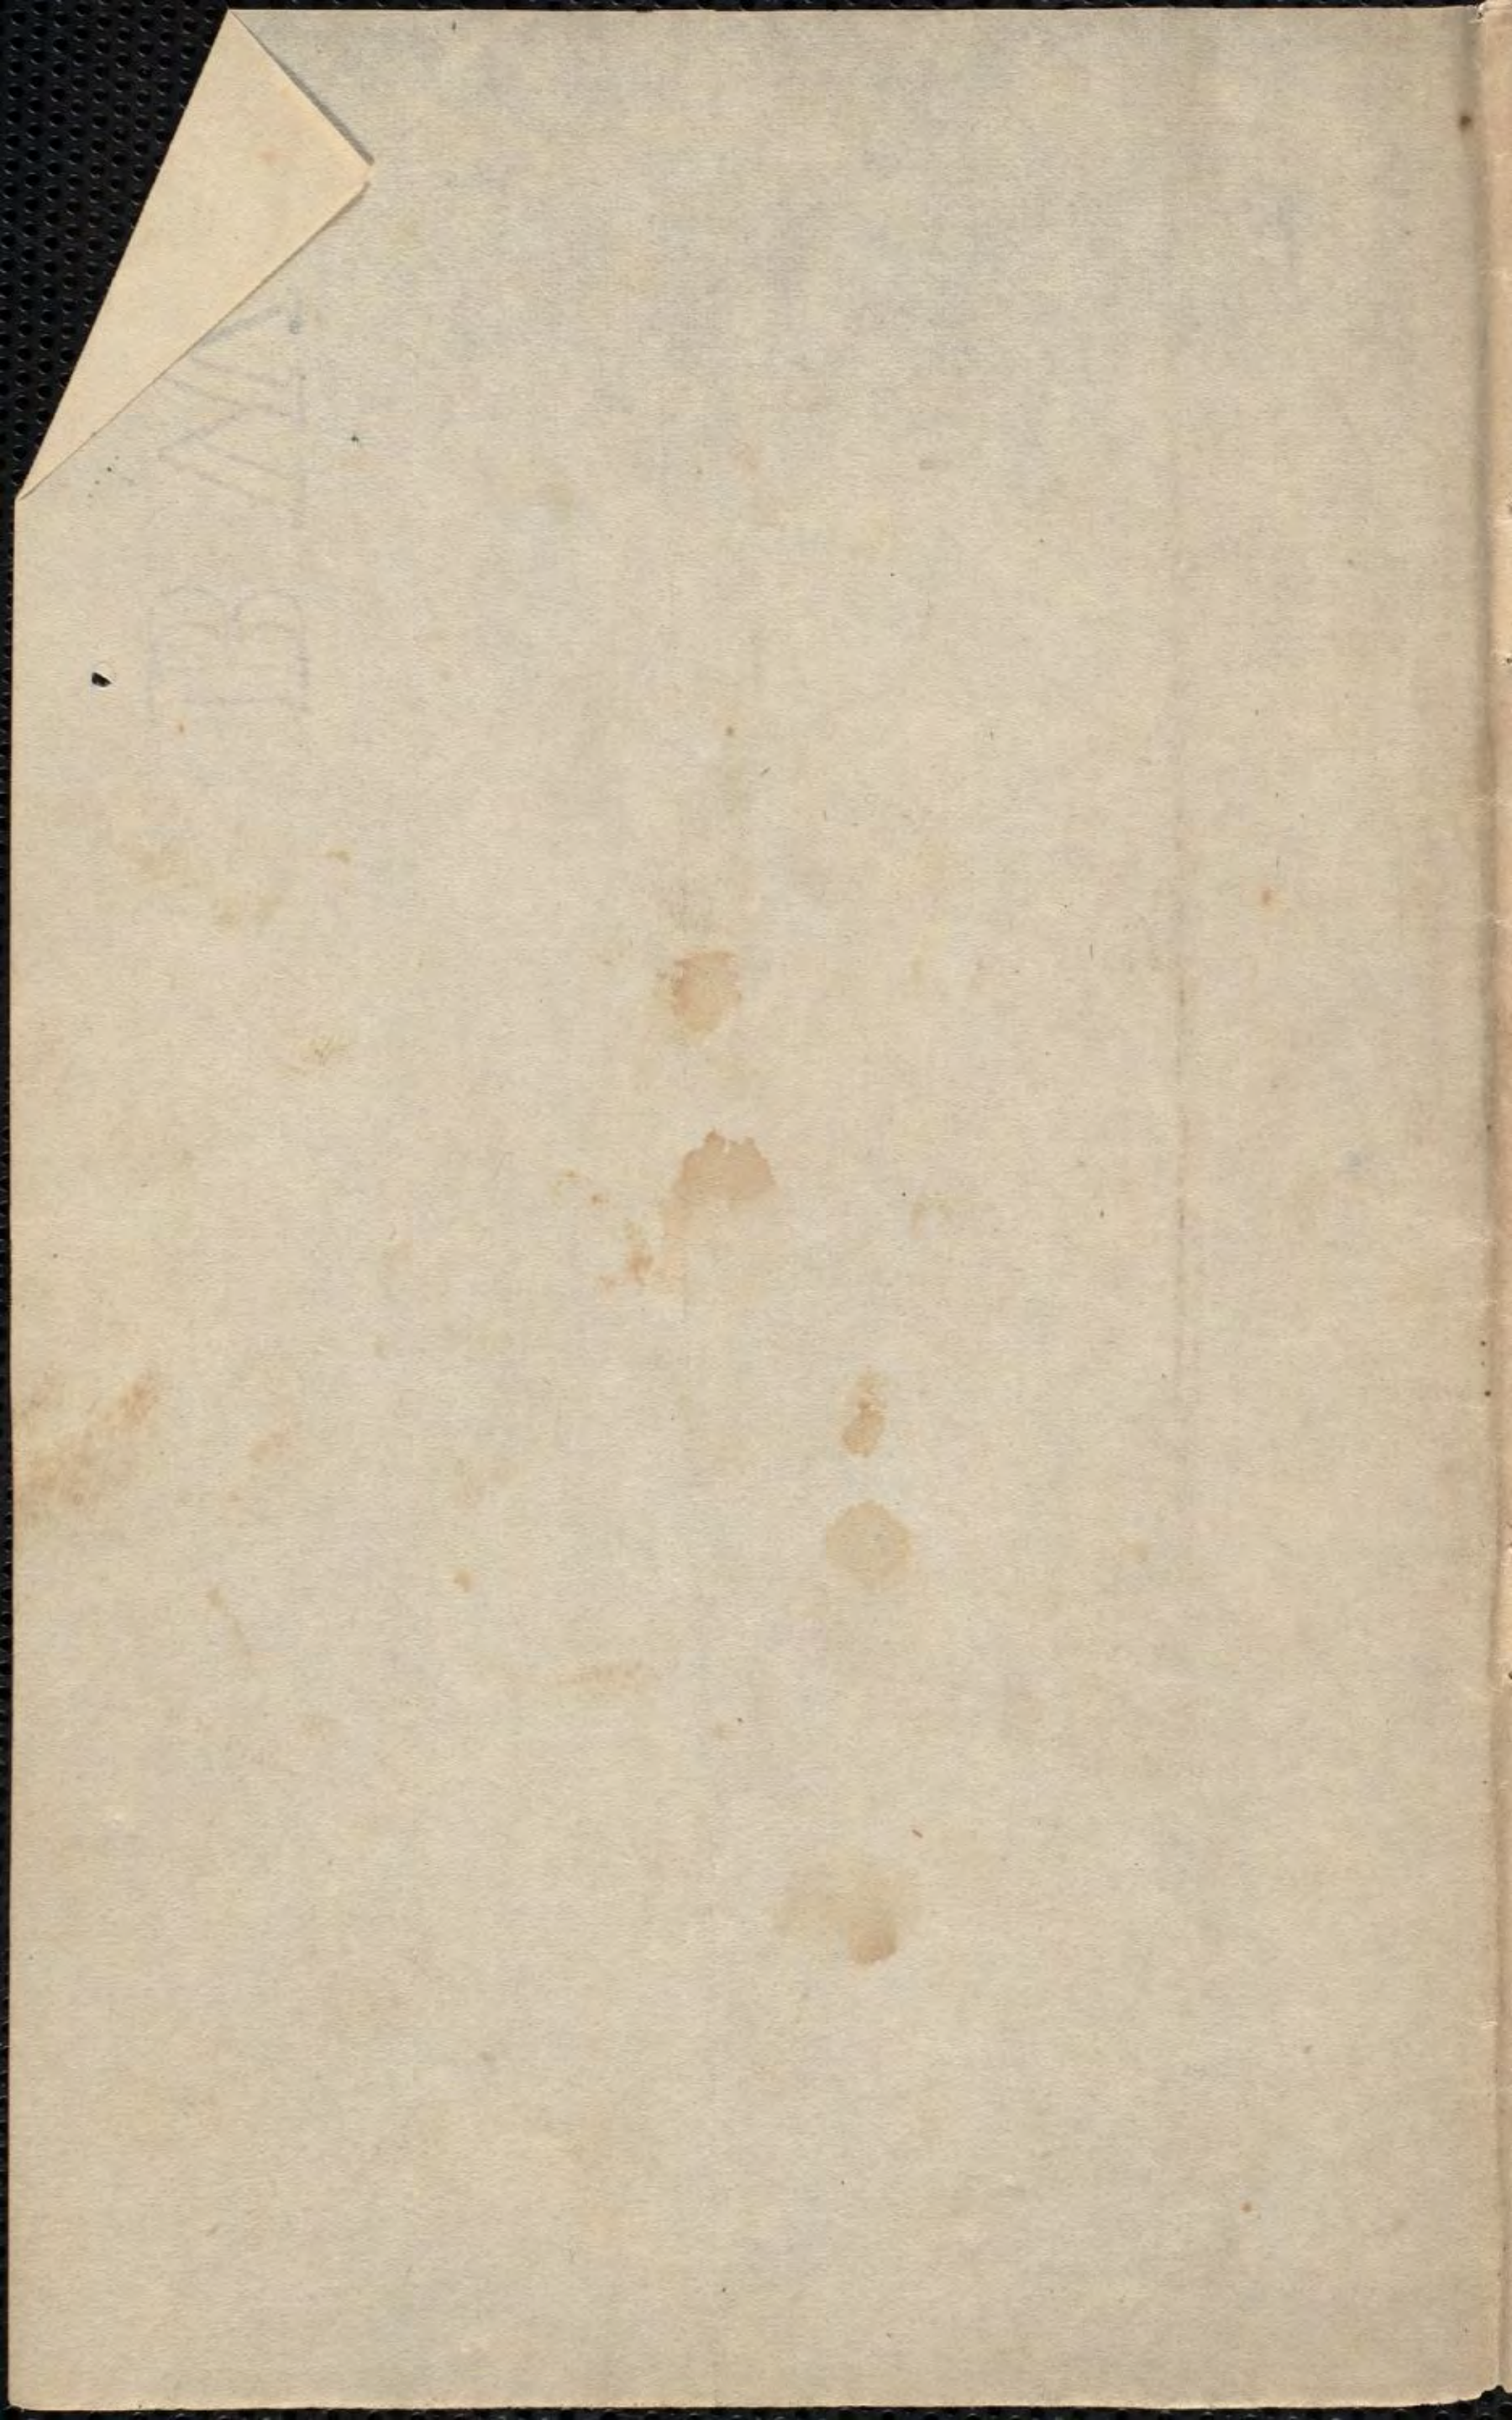

Carnivorous animals are thought
Lyon, cats &c - but the Beavers (Cas-
tor) living upon vegetables is a prodigiously strong animal. The Elephant
no less famous for wisdom than strength
lives wholly upon vegetables - man with

Dr Barton asserts what I think
not true that every animal is Carni-
vorous. Sheep upon the Shetland
Islands eat dead fish, cast upon
the shore in winter. Many animals
will eat vegetables & many flesh
but I doubt if all would volun-
tarily eat animal food

"Studium sine calamo somnium."

Women frequently have swelled feet
for years without dropsy, as in J. Wharton
but in man it is frequent, perhaps
always the precursor of Dropsy Syd.

Rush. P. 345 -

In women who have married when
advanced in years. flatus has so
imposed upon them as to lead
to the belief of their pregnancy
sensations of the motion of the child
de - sickness, but subsiding
frustrate.

Sydenham says mild purgatives
are injurious in dropsy - but places
is dependence upon active ones.

He never mentions Diaphoretics
and does he mention U.S.

Vomits are certainly excellent when
the patient can bear it.

The sensible qualities of the air
never produce epidemics. Syd. P. 30. M.

Sept. 9th 1814.

Doctor Parish cautions that in Typhus fever the patient should frequently be wake to take nourishment. Sleep times very much.

Operation of taking up the Veneral artery external Sliae cutting from the point between the pubis (symphyses) and the Anterior = Superior = spinous process of the Ilium - and cut upwards. Feel for the artery -

Also - for subclavian after drawing the skin over the clavicle cut upon it, then pinch up and cut up from the insertion of the sterno-clavicular, trans. S. muscle, ~~to the~~ along this muscle - Feel for the tubercle of the subcl. vein and without it the beating artery. The fascia of which cut away carefully and take up the artery deliberately. Much care must be taken to find the artery and deliberately coalesce as ever requisite.

The arrangement is beautiful, but
the Methodus Medendi cannot be governed
by the proximate cause - we can't practice
according to it.

" a moderately strong pulse, when recumbent but
ruried by the mind seldom exceeds 120 - a
weak in same posture often 136; & 150 in erect.
When nervous or putrid fevers. -" Page 13.

" Children should always fed with milk -
this proper food - must cuddle. Children &
calves die with any other - meal should
not be mixed with their food because

it will ferment & sugar will quicken it -
when brought up without the breast, milk
should be the diet for months entirely.
This should be insisted upon ---

Band compend. 2^d - ether - a teaspoon in
palm of hand held to part as long as can be
born for pains spasms

are very fetid they are usually

connected with a depraved state of the
alimentary canal - Labon pulvevian
N. Y. C. - - - - -

Dr Chapman predicted that
Castor would become an important
medicine - and the Medical
Journal gives us cases it has been
used as a substitute for Peruvian
Bark in intermittent fever

Dr Caldwell - done at Palermo -
and introduced by the knowledge
that but says not cured -

Maybe used in all diseases
of the alimentary canal - In putrid
fevers intermittent Dysentery &
Diarrhea - Cholera Infantum after
purging is unnecessary. This in-
formation from the celebrated Dr
Jackson Inspector Gen of W B M
Army in India

Dec. 11th Dr Chapman says that the
experiments of Bertrand have been tried
again in France and found not true

with regard to the antivenereal powers
of Carbon.

Sweat will not take place when
the skin is about 100. Recent Phlegm
has 102.

After Use: of Antivenereals detriments
giving in order to produce sedosion
may induce vomiting.

When the skin is too Hot cold
water

Be careful that you do not
disturb the efforts at Purging sedosion
by purging

Flannel useful to encase dis-
eases but Dr Chapman says that
they are bad - Clean linen ever
good.

Dec^r 12th

Chapman. Cholera Infantum.

Purge too much. weaken. Black
berry Root as tonic astringent
(Harris)

In acute Rheumatism Diaphoretics
give no relief and therefore we
should say do no good in the
first stages.

Dec. 13th 1815

The Eupatorium seems to be a
general stimulant and is very much
to be experimented upon. A most
excellent medicine. Dr. Keokuk gives
it in the fever called the break
bone and because it relieves
this distressing symptom it has
gotten and retains the name
of Bone-set.

Diaphoretics

Camphor with Spec: & Gum
Sp: Minderin of Riverius.
Excellent in stopping the Paroxysms
of Intermitents. I give at night
at least in doses of ℥ss. ʒj.

Daphne Mezereum grows on
the banks of the Ohio.

Dr. Percival has written upon the
Med: in Ven. & of the other Remedies.

64 gr. Arsenic Acid dissolved in water, boil,
 and add sufficient aqua q to make a
 pint ZIX . — 4 grains of Arsenic in
 Every Zj of Fowler's solution Zanmin
 page 54 Zanbertia — 60 qts should make
