

I do hereby certify, that I have had occasion to visit
the U. States Marine hospital at Charlestown,
both before and since Dr Waterhouse's appointment
to that department; and am clearly of opinion, that
it has been much improved by the rules and
regulations established by him; that he appears
to have the interest of the establishment much
at heart; and that I believe that the duties of
his office are discharged with fidelity & ability.
— In difficult & extraordinary cases, he is
not above asking the advice of such of his
medical friends as he thinks most capable
of giving him assistance, for the relief of
his suffering & distressed patients—

James Lloyd

I hereby certify, that I have several times visited the
Narine Hospital at Charlestown by desire of the
late Dr. Jarvis; that since his death, I have
been called on for advice, in several cases in
said hospital by Dr Waterhouse. — I have
been much pleased with the improvements
which he has ~~been~~ made, and the regulations
which he has established; and am fully of
opinion that the duties of his office cannot
be discharged by any person with more fidelity
and ability.

Samuel Danforth.
